Faculty of Sports Medicine & Physiotherapy

SYLLABUS

FOR

MASTERS IN PHYSIOTHERAPY (ORTHOPEDICS)
(SEMESTER: I – IV)
(Credit Based Evaluation and Grading System)

Session: 2019-20

GURU NANAK DEV UNIVERSITY
AMRITSAR

Note:  (i) Copy rights are reserved.
       Nobody is allowed to print it in any form.
       Defaulters will be prosecuted.

(ii) Subject to change in the syllabi at any time.
       Please visit the University website time to time.
**MASTERS IN PHYSIOTHERAPY (ORTHOPEDICS) (SEMESTER SYSTEM)**
*(Under Credit Based Continuous Evaluation Grading System)*

**Scheme of Examination**

**Duration:** 2 years  
**Eligibility:** Bachelor in Physiotherapy with at least 50% marks in aggregate.

**A. Theory Examination:**  
**Semester – I:**

B. Practical Examination – 24 Credits

Practical examination of 24 credits will be conducted at the end of 4th semester which includes patient evaluation and management, viva–voce etc.

C. Dissertation – 24 Credits

The topic of dissertation will be allocated in Second Semester and candidate will work for 2 semesters and submit a written thesis in 4th semester. The student will be awarded grade for the total number of credits earned in dissertation in II, III and IV semesters of study at the end of the IV semester.

Practical Attachments:

To enable the students to acquire practicing in hand on skills, maximum emphasis will be laid on regular practical classes, demonstration and clinical practice. The students will undergo Clinical / Government Medical College Amritsar, and decided by BOC.

* The credits earned by a candidate in practical and dissertation during different semesters will be evaluated at the end of the 4th semester and the grade will be determined accordingly.

* A candidate shall be required to maintain minimum of 5.00 SGPA at the end of each semester. A student getting ‘C’ or lower grade in any course in this discipline will be treated as having failed in that course and shall have to repeat the core/elective courses/or repeat/opt. another course in lieu of interdisciplinary/outside department course with approval of Board of Control, and will have to obtain at least ‘B’ grade in that course within specified period as per the prevailing rules. The weights of ‘C’ and lower Grades will not be counted in SGPA or CGPA.

** Interdisciplinary/Optional Course: to be offered from outside the department.

Mid Semester Examination: 20% Weightage
End Semester Examination: 80% Weightage

Instructions for the Paper Setters:
Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
Applied Anatomy: A Review

1. A review of organization and regulation of motor system.
   a) Types of movement and factors affecting contact and range of motion at synovial joints
   b) Skeletal muscle fibers: composition, structure and characteristics
   c) Muscle metabolism
   d) Contraction and relaxation of muscle
   e) Control of muscle tension

2. Anatomy of certain diseases
   a. Common dislocations
   b. Low back pain
   c. Sciatica
   d. Lesions of inter-vertebral disc
   e. Anatomical and Physiological loss resulting from nerve injury.
   f. Peripheral nerve entrapment(such as carpal tunnel syndrome, cubital tunnel syndrome, tarsal tunnel syndrome, morton neuroma)
   g. Spinal infection

Section-B
Applied Physiology

1. Blood
   a. The various components of blood
   b. Viscosity correlation
   c. Oxyhemoglobin Dissociation curves
   d. Interrelationship between pressure flow and resistance
2. **Cardiovascular system**
   a) Cardiac cycle
   b) Cardiac output and its regulation
   c) Cardiac output in normal stress conditions
   d) Methods of measuring cardiac output
   e) Oxygen demand theory of local blood flow circulation
   f) Mechanisms of arterial pulse regulation
   g) Hypertension
   h) Normal coronary blood flow along with variations
   i) The cardiac reserve
   j) Physiological causes of shock

**Section-C**

**Respiratory system:**
   a. Review of mechanics of respiration
   b. Pulmonary volumes and capacities
   c. Transport of oxygen in blood
   d. Carbon dioxide in blood
   e. Regulation of respiration
   f. Respiratory abnormalities Hypoxia, Hypercapnoea, Hypocapnoea
   g. Artificial respiration
   h. Disorders of respiration- dyspnœa, orthopnoea, hyperpnoea, hyperventilation, apnoea, tachypnoea
   i. Respiratory changes during exercise.

**Section-D**

**Endocrine system:**
   Physiology of the endocrine glands – Pituitary, Pineal Body, Thyroid, Parathyroid, Adrenal, Thymus, Pancreas, Testes & Ovary. Hormones secreted by these glands, their classifications and functions.

**References:**

OPL502: Human Kinesiology

Max. Marks: 100
Internal: 20
External: 80

Mid Semester Examination: 20% Weightage
End Semester Examination: 80% Weightage

Instructions for the Paper Setters:
Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
1. Definition, aims, objectives and role of Kinesiology in physiotherapy.
2. Review of fundamental concepts (applied aspect), Centre of gravity, Line of gravity, Planes, Lever system in Body, Fundamental starting positions.

Section-B
1. Frame work and joints of the body: Classification of the muscles and their structure, functions and role.
2. Types of Muscle contractions (Static, Concentric and Eccentric), Two joint Muscles, Angle of pull, Role of Gravity affecting muscular action.

Section-C
1. Physical Properties of bone, cartilage and muscle and their functional adaptation in various conditions.
2. Joints: Definition and Classification of joints- Shoulder, Elbow, wrist joint, Hip, Knee, Ankle, Inter-vertebral joints, small joints of hand and foot.
3. Origin, insertion, nerve supply and action of all important muscles related to human movement.

Section-D
1. Motion, type of motion, Distance and speed, Displacement and velocity, Acceleration, Angular distance and Angular displacement, Angular Speed, Angular Velocity, Angular Acceleration, Inertia, mass, weight, Newton’s Laws of motion, Sections in linear and angular motion.
2. Force and its characteristics, internal and external forces, Classification of force system, Composition and resolution of forces. Friction, impact, elasticity, principles of spin and rebound, Eccentric forces, Moment, Principles of Lever, Rotatory force, Gravity, Methods of finding centre of gravity, Principles of Equilibrium, principles of projectile.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
2. Musculoskeletal examination: special tests, Posture, Gait, etc.

Section-B
Assessment of upper extremity parts:
   a) Shoulder complex
   b) Elbow
   c) Forearm
   d) Wrist and
   e) Hand

Section-C
Assessment of lower extremity parts:
   a) Pelvis
   b) Hip
   c) Thigh
   d) Knee
   e) Leg
   f) Ankle and
   g) Foot

Section-D
Assessment of Vertebral column:
   a) Cervical region
   b) Thoracic region
   c) Lumbo-scaral region
   d) Sacro-iliac region

Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
Research Methodology:
1. Introduction
   a. Importance of research in clinical practice
   b. Scientific approach
   c. Characteristics
   d. Purposes and limitations.
2. Ethical issues in research.
3. Structure, formulation and implementation of a research project
4. Research questions
   a. Selection and statement of problem
   b. Literature review
   c. Meta-analysis.

Section-B
1. Types of research
   a. Basic and Applied
   b. Qualitative & Quantitative
   c. Descriptive & Experimental
   d. Longitudinal & Cross-sectional
2. Experimental Research
   a. Types of Sampling
   b. Variables
   c. Experimental design
   d. Factorial design

Section-C
Survey research:
   a. Conducting a survey
   b. Questionnaires
   c. Steps in conducting survey research
   d. Epidemiological research
Biostatistics

a. Mean, Mode, Median
b. Standard deviation
c. Correlation and regression
d. ANOVA and its application
e. Validity and reliability
f. Parametric (Student ‘t’ test, Paired ‘t’ test, Probability)
g. Non-parametric statistics (Chi square test, Wilcoxon’s signed rank test)
h. Sample size determination

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
2. Inflammation

Section-B
1. Repair, wound healing by primary and secondary union, factors promoting and delaying the process. Healing in specific site including bone healing. “Failed” healing responses.
2. Repair of soft tissue injuries.
4. Basic pharmacokinetics and Pharmacodynamics.

Section-C
1. The use of drugs in various musculoskeletal disorders.
2. The use of drugs in various cardiovascular disorders.
3. The use of drugs in various neurological disorders.
4. The use of drugs in various Respiratory disorders.

Section-D
1. Basics of radiology including ultrasonography, X-ray, CT & MRI scanning
2. Imaging of the head and neck.
3. Imaging of spine.
4. Imaging of thorax and abdomen.
5. Imaging of upper extremity.
6. Imaging of lower extremity.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
Introduction to Human Biomechanics
1. Mechanics - Definition of mechanics and Biomechanics
2. Principle of Biomechanics
3. Nature and importance of Biomechanics in Physiotherapy
4. Elasticity - Definition, stress, strain, Hooke’s Law

Section-B
Biomechanics of upper and lower extremities
1. Biomechanics of shoulder motion
2. Biomechanics of elbow motion
3. Biomechanics of wrist and hand motion
4. Biomechanics of pelvic motion
5. Biomechanics of hip motion
6. Biomechanics of knee motion
7. Biomechanics of ankle & foot motion

Section-C
Biomechanics of spinal region
1. Biomechanics of cervical region
2. Biomechanics of thoracic region
3. Biomechanics of lumbosacral region
4. Biomechanics of sacroiliac joint
Section-D

Posture & Gait

1. Posture – dynamic and static posture, kinetic and kinematics of posture, analysis of posture, effect of age, pregnancy, occupation on posture.

2. Gait – kinematics and kinetics of gait, Biomechanics of running and stair climbing.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section-A
1. Define Rehabilitation, Goals and Objectives of Rehabilitation, multidisciplinary approach of rehabilitation.  
2. Modern concepts in rehabilitation.  
3. Definition, details of effects and uses of therapeutic exercises.  
   a. Dynamic Exercises  
   b. Isokinetic Exercises  
   c. Isometric and Isotonic Exercises  
   d. Kinetic chain exercises

Section-B
1. Stretching  
2. Balance and coordination exercises  
3. Factors affecting the joint range of motion prevention of stiffness, methods of joint mobilization.  
4. Causes of muscle weakness, Prevention of disuse atrophy, Principles of treatment to increase muscle strength and function.  
   a. Techniques of strengthening with respect to regional consideration.  
   b. Various methods of progressive resisted exercise.

Section-C
1. Principles and application of neuromuscular facilitation techniques including PNF  
2. Principles of different soft tissue mobilizations(such as Myofacial Techniques)  
3. Neural Tissue Mobilization  
4. Methods for improving neuromuscular control, proprioception and Kinesthetic sensation following different injuries.
MASTERS IN PHYSIOTHERAPY (ORTHOPEDICS) (SEMESTER – II)
(Credit Based Evaluation and Grading System)

Section-D

1. Muscle Energy Technique
2. Concept of group therapy.

Section-A
2. Common fracture and dislocation of upper extremities

Section-B
1. Common fracture and dislocation of Lower extremities
2. Common fracture and dislocation of spine

Section-C
2. Fracture management- First-aid and advance action.
3. Rehabilitation of fracture.

Section-D
Amputation- Types, Levels & procedures.
Pre and post operative rehabilitation.
Prosthesis and stump care.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Introduction to manual therapy
   a. Joint techniques
   b. Manual joint therapy
   c. Traction Principles
   d. Basic principles of manipulation for various disorders of the spine and extremities.

Section- B
1. Biophysics, Physiological effects, indications, contraindications and specific uses in Physiotherapy of the following equipments:- such as Infrared rays, Paraffin Wax Bath, Moist Heat Pack, Fluidotherapy, LASER, UVR.
2. Massage: - Definition and classification of massage techniques, Physiological effects of massage, Connective tissue massage, therapeutic applications and contraindications of massage.

Section- C
2. Cryotherapy- Physiological effects, Use of cold therapy in acute phase, rehabilitative phase, preventive phase of injury, Methods of application, Indications and contraindications.

Section- D
Electrotherapy approach-
1. Principles underlying the application of following modalities with reference to their production, biophysical and therapeutic effects, indications and contraindications and the specific uses in Physiotherapy.
   b. Medium Frequency Current: IFT, Russian Currents.
   c. High Frequency Currents: SWD, MWD, Ultrasound.
Practical:
1. The students will undergo clinical training in the Health Centre on various apparatus of physiotherapy. This training will constitute major part of the practical examination.

**Max. Marks:** 100

**Internal:** 20

**External:** 80

Mid Semester Examination: 20% Weightage
End Semester Examination: 80% Weightage

**Instructions for the Paper Setters:**
Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

**Section- A**
1. Role of anthropometric knowledge in Physiotherapy.
2. Age determination: -Skeletal age, Dental age.

**Section- B**
1. Body measurements
   a. Gross size and mass
   b. Lengths or heights of body parts
   c. Circumstances of body parts
   d. Skinfold thickness

**Section- C**
1. Anthropometric study group measurements
   a. Planes of the body
   b. Axes of the body
   c. Landmarks on the body

2. Body composition
   a. Different Body composition
   b. Various methods to estimate body composition
      i. Anthropometric determination of the body composition (skinfold thickness)
      ii. Application of surface anthropometry (the body profile)
Section- D

1. Somatotyping
   a. Sheldon’s method of somatotyping
      i. Critical evaluation of Sheldon’s method of somatotyping
   b. Heath – Carter method of somatotyping
      i. The rating scales
      ii. Anthropometric measurements
      iii. First, Second and Third Components
      iv. Somatotype distribution

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

**Section- A**

1. **Nutrition**
   a. Carbohydrates, Fats, Proteins.
   b. Vitamins, Minerals and Water.
   c. Optimal Nutrition for Physical activity.

2. **Energy Transfer in Physical activity:**
   b. Energy transfer in exercise.
   c. Energy expenditure during various activities.
   d. Fatigue.

**Section- B**

1. **Cardiovascular adaptation to exercise:**
   a. Cardiovascular adaptations to sustained aerobic exercises.
   b. Coronary heart disease, exercise and optimization of lipid profile.
   c. Regulation of circulation during exercise.
   d. Circulatory responses to various types of exercise regulation of cardiovascular system during exercise.

**Section- C**

1. **Respiratory responses to exercise:**
   a. Regulation of Respiration during exercise.
   b. Ventilation at Rest and during Exercise.
   c. Ventilation and the Anaerobic Threshold.
   d. Static and dynamic lung volume.
   e. Adaptive changes in the respiratory systems due to regular physical activities.
Section- D

1. **Musculoskeletal responses to exercises:**
   a. Growth and Exercise.
   b. Training for Muscular Strength and Endurance.

2. **Endocrine system responses to exercise:**
   a. Effects of exercise on various Hormones in the body.
   b. Hormone regulation of fluid and electrolytes during exercise.
   c. Exercise and Menstrual Cycle.

OPL604: PHYSIOTHERAPY IN NON–TRAUMATIC ORTHOPEDIC CONDITIONS

Max. Marks: 100
Internal: 20
External: 80

Mid Semester Examination: 20% Weightage
End Semester Examination: 80% Weightage

Instructions for the Paper Setters:
Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Metabolic bone disorders - Rickets, Osteomalacia, Osteoporosis and Scurvy.
2. Congenital disorders
   a. Congenital Torticollis
   b. Congenital Talipes Equinovarus (CTEV)
   c. Developmental dysplasia of hip (DDH)
3. Skeletal Tuberculosis: - Spine, Hip, Knee

Section- B
1. Joints Disorders
   a. Arthritis
   b. Infective Arthritis
   c. Septic Arthritis
   d. Charcot’s joints
   e. Hemophilic arthritis
   f. Syphilis of joints
2. Rheumatic diseases
   a. Rheumatic Arthritis
   b. Ankylosing Spondylitis
3. Degenerative diseases

Section- C
2. Common bone neoplasias.

Section- D
Regional Orthopedics condition:- Torticollis, Thoracic outlet syndrome, Impingement Syndromes, Coxa vara, Coxa valga, Genu Valgum, Genu Varum, Genu recurvatum, Pes Cavus, Pes Planus, Painful heel conditions.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Review of anatomy and pathomechanics of vertebral column
2. Congenital disorders of vertebral column
3. Acquired deformities of vertebral column

Section- B
1. Traumatic injuries of vertebral column: General & regional

Section- C
1. Review of anatomy and pathomechanics of Upper extremity.
3. Common musculoskeletal conditions of Elbow joint: Tennis elbow, Golfer’s elbow, Olecranon bursitis, Cubital varus & valgus deformity, Mayositis ossificans.
4. Common musculoskeletal conditions of wrist and hand complex: De Quervain’s disease, Trigger finger, Dupuytren’s contracture, Carpal tunnel syndrome, Kienbock’s disease.
Section- D

1. Review of anatomy and pathomechanics of Lower extremity.

Practicals:
1. Students will undergo practical training at GNDU Campus, Amritsar.

Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Anatomical and kinesiological basis of posture
2. Biophysics of posture
3. The nervous & musculoskeletal system in posture

Section- B
1. Postural disorders of spine, such as Kyphosis, lordosis, scoliosis, flat back, round back.
2. Parameters used to determine postural disorders of spine
3. Diagnosis and management of postural disorders of spine
4. Postural disorders of upper extremities

Section- C
2. Parameters used to determine postural disorders of lower extremity
3. Diagnosis and management of postural disorders of lower extremity

Section- D
1. Introduction to human gait cycle, Forces responsible for gait.
2. Identification of functional Gait disorders
3. Gait analysis system
4. Correction of gait disorders
References:

2. Dynamics of Human Gait, Christopher L. Vaughan, Brian L. Davis.
4. Clinical disorder of Balance, Posture and Gait, Adolfo M. Bronstein, Thomas B.
5. Gait Analysis Normal and Pathological Function, Jacquelin Perry.
7. Clinical Orthopedic Rehabilitation, Brent Brotzman.
9. Physical Rehabilitation Assessment and Treatment, Susan O Sullivan, Jaypee brothers
OPL653: ORTHOPEDIC REHABILITATION & ETHICAL PRINCIPLES

L T P Max. Marks: 100
4 0 0 Internal: 20

Mid Semester Examination: 20% Weightage
End Semester Examination: 80% Weightage

Instructions for the Paper Setters:
Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Conceptual framework of rehabilitation, roles of rehabilitation team members, definitions and various models of rehabilitation.
2. Locomotors disability, impact of disability on individual, family, and society.
3. Preventive aspects of disability
4. Rehabilitation: Such as institutional based rehabilitation, outreach programs, Community based rehabilitation.

Section- B
1. The principles and methods of vocational and social rehabilitation
2. Architectural Barriers: Describe architectural barriers and possible modifications with reference to various orthopedic conditions.
3. The principles and process of disability evaluation.
4. Activities of Daily Living (ADLs).

Section- C
1. General Principles of Orthotics- classification, indications, contraindications, disadvantages and uses according to various regions.
   a. Orthotics for the Neck and Spine
   b. Orthotics for the Upper Limb
   c. Orthotics for the Lower Limb
2. General Principles of Prostheses- classification, indications, contraindications, disadvantages and uses according to various regions.
   a. Prosthetics for the Upper Limb
   b. Prosthetics for the Lower Limb
Section- D

2. Professional ethics for Physiotherapist:
   a. Concept of Morality, Ethics and Legality
   b. Professionalism
   c. Sexual and Physical Abuse
   d. Social characteristics and Personal relationships
   e. Professional issues
   f. Client interest and satisfaction
   g. Confidence and communication
   h. Malpractice
   i. Negligence
   j. Rights of patients
   k. Status of physiotherapist in health care

Eight questions of equal marks (Specified in the syllabus) are to be set, two in each of the four sections (A-D). Questions may be subdivided into parts (not exceeding four). Candidates are required to attempt five questions, selecting at least one question from each Section. The fifth question may be attempted from any Section.

Section- A
1. Manual Therapy: Introduction, Classification, Assessment for mobilization and manipulation. The concepts of mobilization, such as:
   a. Maitland
   b. Cyriax,
   c. Kaltenborn
   d. Mennel
   e. Mulligan
   f. McKenzie

Section- B
1. Pain: Assessment & management
2. Butler mobilization of nerves
3. Review of Special tests for various joints

Section- C
1. Myofascial Release: Concept & brief discussion of its application technique
2. Muscle Energy Techniques
3. Positional release technique
4. Principles of Taping and application- Rigid & Dynamic Taping

Section- D
1. Segmental Stabilization Concepts of Spine:
   a. Muscle function in spinal stabilization
   b. Contribution of various muscles to spinal stabilization
   c. Local Muscle dysfunction in Low back pain
   d. Principles of clinical management of deep muscle system for segmental Stabilization.
