## Course Code: ARL–101 Course Title: Theory of Structures –I

Duration of Examination: 3 Hrs Credits: 03 (L=2, T=1, U=0)

## **Course Contents:**

#### PART I

Introduction to Elementary theory of structure, Centre of gravity (CG), definition, centre of gravity of plane figures, CG by method of moments, numerical problems, Moment of Inertia; MI of plane area, MI by method of integration, MI of rectangular section, theorem of parallel axis (M1) and perpendicular axis and numerical problems.

## PART II

Bending moment (BM), shear force (SF), type of supports, loads and beams, relation between SF and BM, BM and SF diagram for cantilever and simply supported beams with concentrated load, uniformly distributed load, design examples.

Moment of resistance, theory of bending, bending stresses, basic equation of bending, sectionmodulus of rectangular and circular sections. Numerical problems.

## PART III

Classification of frames, analysis of perfect frame, assumptions, method of sections, method of joints and design examples. Link polygon, method of construction, resultant of concurrent forces, non–concurrent forces, co– planar parallel force system and numerical problems.

- 1. Punmia, B.C., "Strength of Materials and Theory of Structures", Vol. I, Laxmi Publications, New Delhi, 2010.
- 2. Ramamurtham, S.; "Strength of Materials", Dhanpatrai & Sons, New Delhi, 2011.
- 3. Nash, W.A., "Strength of Materials", Schaums Series, McGraw Hill Book Company, New York, 1989.
- 4. Bansal, R.K., "Engineering Mechanics and Strength of Materials", Lakshmi Publications, New Delhi, 2009.
- 5. Rajput, R.K., "Strength of Materials", S .Chand & Company Ltd., New Delhi 2010.

Course Code : ARL-102 Course Title: Building Sciences –I (Geology, Soils & Natural Calamities) Duration of Examination: 3 Hrs Credits : 03 (L=2,T=1,U=0)

## **Course Contents:**

## PART I

Introduction to building Science, Relevance of building science in Architecture, General Geology of Earth's Crust, Modes of Rock formation. Action of River, Glacier's sea, Wind, and the underground water.

Factors governing selection of Building Stones, geological criteria governing selection of sites. Terminology and basic knowledge (causes & impact) of natural calamities–Earthquakes, Tsunami, Landslides, Floods, Volcanoes, Cyclones, Hurricanes etc.

## PART II

Type and characteristics of soils, classification of soils: as per particle size, texture particle size, Texture; Highway Research Board, Unified Soil Geological and I.S. classification system. Introduction to soil mechanics, soil as three phase system, water content, UNIT weight, specific gravity, void ratio content and functional relationship.

## PART III

Bearing Capacity of Soil-basic definitions, factors affecting bearing capacity of soils. Determination of bearing capacity by plate load test, cone penetration test, Methods to improve Bearing Capacity of Soils. Earth Pressure: Introduction to Active Earth Pressure & Earth Pressure at rest.

- 1. Singh, Parbin, "Engineering and Geology", S.K. Kataria & Sons, New Delhi, 2010.
- Simha, Bharata. Parkash, Shamsher; "Soil Mechanics and Foundation Engineering", Nem Chand & Bros., 1990.
- 3. Mukherjee, Pratip Kumar; "A Textbook of Geology", World Press Pvt. Ltd., Kolkata. 1969
- 4. Mears, Brainerd ,"The Changing Earth- An introductory Geology ", Van Nostrand Reinhold Company.1970
- 5. Harbeck ,Richard M; Johnson, Lloyd K; " Earth & Space Science", Holt, Rinehart & Winston, Inc., New York.1965

Course Code : ARU-103	<b>Duration of Examination : 4 Hrs</b>
Course Title: Arts & Graphics –I	Credits : 03 (L=1,T=0,U=2)

## **Course Contents:**

- Different strokes used in pencil (2B, 4B, 6B), Charcoal pencil.
- Free hand still life sketching in pencil of various solids like cones, cubes, cylinders and spheres.
- Free hand drawing of objects of daily use like lamp, jug, bottle, cup, book etc.
- Free hand sketching in pencil of trees, shrubs, human figures, lamp posts, rocks etc.

- 1. Williams, Guy R., "Drawing and Sketching" Museum Press, 1963
- 2. Gill, Robert W., "Basic Rendering", Thames & Hudson Australia Pty Limited, 1991
- 3. Goldman, Ken, "Charcoal Drawing", Water Foster Publishing Incorporated, 2011
- 4. Gill, Robert W., "Rendering With Pen & Ink" Thames & Hudson Australia Pty Limited, 1990
- 5. Pitz, Henry C, "Charcoal Drawing" Watson-Guptill Publications, Incorporated, 1950

## Course Code : ARU–104 Course Title: Architectural Drawing–I

Duration of Examination : 4 Hrs Credits : 05 (L=1,T=0,U=4)

## **Course Contents:**

- Various types and grades of lines used in Architectural Drawing.
- Free hand lettering.
- Use of different scales (plain & diagonal) in Architecture.
- Drawing of plan, elevation and section of simple objects.
- Orthographic Projections of lines, planes & solids in various positions
- Section through solids
- Isometric/ axonometric views of solid compositions and buildings

- 1. Bhatt, N.D. and Panchal, U.M. (2004). "Engineering Drawing Plane and Solid Geometry", Charotar Publishing House, Bombay, India reprint 44th Edition 2002.
- 2. Dhawan, R.K. (2005). "A Textbook of Engineering Drawing", S. Chand Publishers, New Delhi, India

## Course Code : ARU–105 Course Title: Building Construction–I

## **Duration of Examination : 4 Hrs Credits : 05 (L=1,T=0,U=4)**

## **Course Contents:**

- 1. Introduction to tools used in masonry.
- 2. Types of Bricks.
- 3. Various types of brick bonds and wall junctions up to 13-1/2" wall thickness.
- 4. Brick Bonds:
- a. English Bond
- b. Flemish Bond (Single and Double)
- c. Rat Trap Bond
- Wall Junctions (English & Flemish bonds).
  - a. L Junction
  - b. Tee
  - c. Cross, and
  - d. Oblique
  - e. (Laying of brick bonds/ junctions on sites)
- Dressing, laying and bonding in Stone Masonry.
  - a. Random Rubble
  - b. Coursed Rubble
  - c. Ashlar
- Construction of brick jallis and boundary walls
- Components of arches and types of Arches.
- Arches in bricks and stones
  - a. Flat
  - b. Segmental
  - c. Semicircular
  - d. Multi-foliated
- Finishing of brick and stone surfaces

- 1. Watson, Don A., "Construction Materials and Processes", McGraw Hill Co., University of Michigan, 1972.
- 2. Mckay, W.B., "Building Construction", Vol.1, 2, 3, Longmans, U.K. 1981.
- 3. Alanwerth, "Materials", The Mitchell Pub. Co. Ltd., London, 1986.
- 4. Chudley, R., "Building Construction Handbook", British Library Cataloguing in Publication Data, London, 1990.
- 5. Barry, R., "Building Construction", East West Press, New Delhi, 1999.

## Course Code : ARU–106 Course Title: Architectural Design–I

## **Duration of Examination : 6 Hrs Credits : 05 (L=1,T=0,U=4)**

## **Course Contents:**

- Two dimensional compositions using different Colours, Textures and grades with Lines.
- Two dimensional Compositions using Geometrical shapes like Rectangle, Circle, Square etc. in paper/cardboard.
- Three dimensional Compositions using Geometrical forms, like cubes, cylinder, Pyramids, spheres.
- Anthropometric study of Human Dimensions followed by design of various Living spaces like Drawing Room, Dining room, Bed room, Kitchen, Toilets, Study, Class room, Offices etc.
- Design of Simple Structure like Bus Shelter, Milk Bar etc.

- 1. Chiara, Joseph De "Time Saver Standards for Building types" McGraw–Hill Professional Publishing, New York, 2001.
- 2. Smithies, K.W. "Principles of Design in Architecture" Chapman & Hall, 1983.
- 3. Ching, Francis D.K. "Architectural Form, Space and Order", Van Nostrand Reinhold International Thomson Publishing, Inc.: New York, 1996.
- 4. Rompilla, Ethel, "Color for Interior Design", Harry N. Abrams, New York, First Edition, 2005.

ENL-101	<b>Duration of Examination: 3 Hrs</b>
Communicative English	Credits: 02 (L=2,T=0,U=0)

**Objective**: To introduce students to the skills and strategies of reading and writing by identifying organizational patterns, spotting classification systems and understanding associations between ideas. This course will prepare students to read a variety of texts and also to communicate more effectively through writing. The course will also pay special attention to vocabulary building.

#### **Prescribed Text books:**

- 1. *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.
- 2. The Written Word by Vandana R. Singh, Oxford University Press, New Delhi.

#### **Course Contents:**

#### 1. Reading and Comprehension Skills:

Students will be required to read and comprehend the essays in Unit 1 and 2 of the book *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition. They will be required to answer the questions given after each essay.

#### 2. Developing Vocabulary and using it in the Right Context:

The students will be required to master "Word List" and "Correct Usage of Commonly Used Words and Phrases" from the Chapter "Vocabulary" in the book *The Written Word*.

#### 3. Writing Skills

Students will be required to learn "Report Writing" and "Letter Writing" as in the book *The Written Word*.

Students will be required to write long essays based on the prescribed text book *Making Connections: A Strategic Approach to Academic Reading.* 

#### Minor 1:

#### Syllabus to be covered:

- 1. Unit 1 from *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.
- 2. Report Writing from TheWritten Word.

#### **Suggested Paper Pattern:**

- 1. Report Writing (8 marks)
- 2. Short answer type questions from Unit 1 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)
- 3. Essay type question from Unit 1 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)

12

#### Minor 2:

#### Syllabus to be covered:

- 1. "Word List" from the Chapter "Vocabulary" in the book The Written Word.
- 2. Unit-2 from the book *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.

#### **Suggested Paper Pattern:**

- 1. Word List from the Chapter "Vocabulary" in the book *The Written Word* (8 marks)
- 2. Short answer type questions from Unit 2 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)
- 3. Essay type question from Unit 2 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)

#### Suggested Paper Pattern for Major Exam:

- 1. Letter Writing as prescribed in *The Written Word* /1 out of 2 (10 marks)
- 2. Short answer type questions from Unit 1,2 of *Making Connections: A Strategic Approach to Academic Reading* (14 marks)
- 3. "Word List" and "Correct Usage of Commonly Used Words and Phrases" from the Chapter "Vocabulary" present in the book *The Written Word*. (10 marks)
- 4. Essay type question from Unit 1,2 of *Making Connections: A Strategic Approach to Academic Reading* 1 out of 2 (8 marks)
- 5. Report Writing from *The Written Word* (8 marks)

## PBL-122: ਮੁੱਢਲੀ ਪੰਜਾਬੀ (In lieu of Punjabi Compulsory)

Credits: 2-0-0

#### ਪਾਠ–ਕ੍ਰਮ

- ਪੰਜਾਬੀ ਭਾਸ਼ਾ, ਗੁਰਮੁਖੀ ਲਿਪੀ ਗੁਰਮੁਖੀ ਲਿਪੀ : ਬਣਤਰ ਅਤੇ ਤਰਤੀਬ
- 2. ਗੁਰਮੁਖੀ ਆਰਥੋਗ੍ਰਾਫੀ ਸ਼੍ਰੂਰ ਬਣਤਰ ਅਤੇ ਉਚਾਰਨ ਵਿਅੰਜਨ ਬਣਤਰ ਅਤੇ ਉਚਾਰਨ
- 3. ਪੰਜਾਬੀ ਸ਼ਬਦ ਬਣਤਰ ਸਾਧਾਰਨ ਸ਼ਬਦ ਇਕ ਉਚਾਰਖੰਡੀ ਸ਼ਬਦ

## ਯੂਨਿਟ ਅਤੇ ਥੀਮ

- ਪੰਜਾਬੀ ਭਾਸ਼ਾ : ਨਾਮਕਰਣ ਅਤੇ ਸੰਖੇਪ ਜਾਣ ਪਛਾਣ, ਗੁਰਮੁਖੀ ਲਿਪੀ : ਨਾਮਕਰਣ, ਗੁਰਮੁਖੀ ਵਰਣਮਾਲਾ; ਪੈਂਤੀ ਅੱਖਰੀ, ਅੱਖਰ ਕ੍ਰਮ, ਸ਼ੂਰ ਵਾਹਕ (ੳ ਅ ੲ), ਲਗਾਂ ਮਾਤਰਾਂ, ਪੈਰ ਵਿਚ ਬਿੰਦੀ ਵਾਲੇ ਵਰਣ, ਪੈਰ ਵਿਚ ਪੈਣ ਵਾਲੇ ਵਰਣ, ਬਿੰਦੀ, ਟਿੱਪੀ, ਅੱਧਕ।
- 2. ਗੁਰਮੁਖੀ ਆਰਥੋਗ੍ਰਾਫੀ ਅਤੇ ਉਚਾਰਨ; ਸੂਰਾਂ ਦੀ ਬਣਤਰ ਅਤੇ ਉਚਾਰਨ (ਲਘੂ-ਦੀਰਘ ਸੂਰ); ਸੂਰ ਅਤੇ ਲਗਾਂ ਮਾਤਰਾਂ; ਵਿਅੰਜਨਾਂ ਦੀ ਬਣਤਰ ਅਤੇ ਉਚਾਰਨ; ਪੈਰ ਵਿਚ ਪੈਣ ਵਾਲੇ ਵਰਣਾਂ (ਹ, ਰ, ਵ) ਦਾ ਉਚਾਰਨ ; ਲ ਅਤੇ ਲ਼ ਦਾ ਉਚਾਰਨ; ਭ, ਧ, ਢ, ਝ, ਘ ਦਾ ਉਚਾਰਨ; ਪੈਰ ਵਿਚ ਬਿੰਦੀ ਵਾਲੇ ਵਰਣਾਂ ਦਾ ਉਚਾਰਨ।
- 3. ਪੰਜਾਬੀ ਸ਼ਬਦ-ਬਣਤਰ : ਸਾਧਾਰਨ ਸ਼ਬਦ; ਇਕੱਲਾ ਸੂਰ (ਜਿਵੇਂ ਆ); ਸੂਰ ਅਤੇ ਵਿਅੰਜਨ (ਜਿਵੇਂ ਆਰ); ਵਿਅੰਜਨ ਅਤੇ ਸੂਰ (ਜਿਵੇਂ ਪਾ); ਵਿਅੰਜਨ ਸੂਰ ਵਿਅੰਜਨ (ਜਿਵੇਂ ਪਾਰ); ਕੋਸ਼ਗਤ ਸ਼ਬਦ (ਜਿਵੇਂ ਘਰ, ਪੀ); ਵਿਆਕਰਣਕ ਸ਼ਬਦ (ਜਿਵੇਂ ਨੂੰ, ਨੇ); ਪੰਜਾਬੀ ਸ਼ਬਦ ਰਚਨਾ-1; ਲਿੰਗ-ਪੁਲਿੰਗ, ਇਕ ਵਚਨ-ਬਹੁ ਵਚਨ; ਨਿੱਤ ਵਰਤੋਂ ਦੀ ਪੰਜਾਬੀ ਸ਼ਬਦਾਵਲੀ-1: ਖਾਣ-ਪੀਣ, ਸਾਕਾਦਾਰੀ, ਰੁੱਤਾਂ, ਮਹੀਨਿਆਂ, ਗਿਣਤੀ, ਮੌਸਮ ਆਦਿ ਨਾਲ ਸੰਬੰਧਿਤ।

16

Bachelor of Architecture (B.Arch.) (Semester-II) (Under Credit Based Continuous Evaluation Grading System)

## Course Code : ARL-152 Course Title: Building Science-II (Building Materials)

Duration of Examination : 3 Hrs Credits : 03 (L=2,T=1,U=0)

## **Course Contents:**

## PART I

Elementary elements of a building; their functions and characteristics

**Brick:** Classification; Uses; Composition of brick earth; Useful and harmful ingredients; Properties of good brick earth; Strength of bricks; Sizes and weight of bricks; Tests; Special forms; Manufacturing process of brick in brief.

**Stone:** Sources; Choice and uses of stone; Characteristics of good stone; Tests for stones; Preservation; Destroying agents; Stone quarrying, dressing and polishing; Artificial Stone.

## PART II

Lime: Sources; Uses; Classification; Characteristics of good lime; testing lime stone; storing; manufacture in brief.

**Cement**: Characteristics and properties; Composition; Harmful ingredients; Tests; Field Examination; Uses; Storage; Varieties; Manufacturing process in brief.

**Concrete:** Properties; Uses; Material based Classification; Proportion of ingredients; Mixing and laying of lime concrete and cement concrete; Consolidating concrete; Construction Joints in concrete; Finishing concrete; curing of concrete; Special type of Concrete; Water Cement ratio; Consistency of concrete

## PART-III

**Timber:** Structure of timber tree, Felling of trees, Characteristics of timber, Defects, diseases, Decay, Seasoning, Preservation, Conversion; Market forms Industrial forms; Various uses of timber.

**Paints:** Uses; Classification; Constituents; Characteristics; application on different surfaces; destroying agents; various paints.

Varnishes: Uses, Ingredients; Types; Characteristics of good varnish, Polishing, process of varnishing.

- 1. Rangwala, S.C., "Engineering Materials", Charotar Publishing House, Gujarat, 1997.
- 2. Punmia, B.C., "Building Construction", Laxmi Publications Pvt. Ltd., New Delhi,
- 3. Lyons, Arthur, "Materials for Architects and Builders An introduction", Arnold, London, 1997.
- 4. Watson, Don A, "Construction Materials and Process", McGraw Hill Co., University of Michigan, New Jersey, 1972.
- 5. Launders, Jack M., "Construction Materials and Methods Careers", South Holland, Illinois Wilcox Co. Ltd., 1986.
- 6. Mckay, W.B.; "Building Construction", Longmans, UK, 1981.
- 7. Ching, Francis D.K., "Building Construction", Illustrated VNR.1975

## Course Code : ARL-153 Course Title: History of Architecture-I

## Duration of Examination : 3 Hrs Credits : 03 (L=2,T=1,U=0)

#### **Course Contents**

## PART I

- A brief reference to the shelters of prehistoric times
- River valley civilizations: Development of Architecture in Indus Valley, Nile Valley and plains of Tigris & Euphrates.
- Development of Architecture in Greek Civilization: Greek Orders, Temples, Optical Corrections, Theatres, Agora, Acropolis, etc.
- Development of Architecture during Roman period: Roman Orders, Temples, forums, basilicas, thermae, amphitheatres, etc.

## PART II

- An overview of developments during the Vedic period
- Development of Buddhist Architecture: Ashokan pillars/ stambhas, Development of stupas, Development of rock cut architecture through the Hinayana & the Mahayana phase (chaityas & viharas)
- Genesis of Hindu Architecture during the Gupta & the Chalukyan period

## PART III

- Development of Dravidian Architecture through different phases: Pallavas, Cholas, Pandyas, Vijainagar & Madura
- Indo-Aryan Architecture: Orissa, Khajuraho & Gujarat
- Jain Architecture

## **Suggested Readings:**

- 1. Cruickshank, Dan; Sir Banister Fletcher's "A History of Architecture", CBS Publishers & Distributors, Delhi, 1999.
- 2. Fletcher, B., 'History of Architecture', CBS Publishers & Distributors, Delhi, 1999.
- 3. Brown, P., 'Indian Architecture (Buddhist and Hindu Periods)', DB Taraporevala Sons & Co. Private Ltd., Bombay, 1971.

- 6. Acharya, P.K., 'Hindu Architecture in India and Abroad', Oriental, New Delhi, 1979.

17

## Course Code : ARU–154 Course Title: Arts & Graphics–II

Duration of Examination : 4 Hrs Credits : 03 (L=1,T=0,U=2)

## **Course Contents:**

- Preparation of Colour wheel in Poster Colours. Use and application of colour wheel
- Outdoor free hand sketching of trees, shrubs, simple buildings, human figures, automobiles etc. in color (Water Colors, Pencil Colours and Poster Colours).
- Rendering of various scenes (small structures) such as Milk bar, Bus Stop, Cafeteria, Petrol filling station etc. in Pen & Ink, Water Colour and mix media.

- 1. Oliver, Robert S., "The Sketch in Color (Architecture)", Van Nostrand Reinhold, 1984.
- 2. Suffudy, "Sketching Techniques", Watson-Guptill, 1985.
- 3. Smith, Ray, "Water Color Landscape", DK Adult, 1993.

- 10. Campanario G., "The Art of Urban Sketching" Quarry Books, Dec 2012.

Course Code : ARU–155 Course Title: Workshop (Carpentry, Welding & Model Making) Duration of Examination : Viva Voce Credits : 03 (L=1,T=0,U=2)

## **Course Contents**:

#### Carpentry

Measuring, cutting and sawing of natural wood in workshop.

Different types of tools used for making joints namely; mortise & tenon joint, mitre joint, lap dove tail joint, T–lap joint, corner lap joint, cross lap joint, bridle joint, shoulder angle joint, through dove-tail joint, rafter joint & notching joint.

#### Welding

Process, types of welding namely gas welding/ oxy-acetylene & arc welding, equipment used, different types of welds and their suitability.

#### **Model Making**

Introduction: Importance of architectural models in the profession, materials used in making different types of architectural models: their types and selection criteria. Techniques for fabrication of geometrical shapes like cube, cuboids, pyramids, prisms etc. Use of wood, cork sheet, mount board, ivory sheet, acrylic, x–ray sheet, tooth picks, threads, pins, etc. Preparation of Model Base: Components of site layout like parking, roads, pavements, landscaping, trees, slope/contours etc. by using materials like ply board, clay, Plaster of Paris, saw dust, foam, cork sheet, velvet sheet, sand paper, thermocol, etc. Preparation of Block Model: Building blocks by using materials like thermocol, wood, mount board, ivory sheet, foam etc. Preparation of Detailed Model: Building blocks with details like windows, doors, porch, balconies, pergola, terraces, parapet etc. Sectional model with details of inside, by using materials like wood, cork sheet, mount board, ivory sheet, acrylic, x–ray sheet, tooth picks, threads, pins, etc.

- 7. Rangwala, S.C., "Engineering Materials", Charotar Pub.House, Gujarat, 1997.

## Course Code : ARU–156 Course Title: Building Construction–II

## **Duration of Examination: 4 Hrs Credits : 05 (L=1,T=0,U=4)**

#### **Course Contents:**

•

- Foundations of walls and columns in stone and brick masonry.
- Damp proof courses of internal and external walls.
- Simple joints used in joinery of doors and windows.
- Introduction to hardware used in doors and windows.
  - Various types of timber windows:
    - 1. Casement with ventilators
    - 2. Wire mesh
    - 3. Clerestory
    - 4. Bay
    - 5. Fixed, side and top hung, pivoted, louvered
- Various types of timber doors
  - Ledged, battened and braced.
  - Panel and Wire mesh
  - Flush
  - Glazed
- Details of lintel, Chhajja and sills in concrete, brick and stone.
- Flat slab construction of RCC/RBC roof slab incorporating terrace and parapet details.
- Plinth band, sill band, lintel band in masonry structures.

- Don A. Watson, "Construction Materials and Processes", McGraw Hill Co., University of Michigan 1972.
- 2. Mckay, W.B., "Building Construction", Vol.1, 2, 3 Longmans, U.K. 1981.
- 3. Alanwerth, "Materials", The Mitchell Pub. Co. Ltd., London, 1986.
- 4. Chudley, R., "Building Construction Handbook", British Library Cataloguing in Publiction Data, London, 1990.
- 5. Barry, R, "Building Construction", East west press, New Delhi, 1999.

## Course Code : ARU–157 Course Title: Architectural Design–II

## Duration of Examination : 6 Hrs Credits : 05 (L=1,T=0,U=4)

## **Course Contents:**

- Design of Memorial, Gateway etc.
- Design of Small structures like Enquiry Booth, Extension counter like ATM, etc.
- Design of Snack Bar, Petrol Pump, Police Assistance Booth, Rural Dispensary, Suvidha Kendra etc.
- Design of Small single storied dwelling units like Studio Apartment, Tourist cottage, etc.

- 1. Smithies, K.W; "Principals of Design in Architecture", Chapman & Hall, London, 1983
- 2. Ching, Francis D.K; "Architectural Form, Space and Order", Van Nostrand Reinhold International Thomson Publishing, Inc.: New York, 1996
- 3. Rompilla, Ethel; "Color for Interior Design", Harry N. Abrams ,New York, First Edition, 2005
- 4. Chiara, Joseph De; "Time Saver Standards for Building types" McGraw-Hill Professional Publishing, 2001

ENL-151: Communicative English	Duration of Examination : 3 Hrs
	Credits : $02 (L=2,T=0,U=0)$

**Objectives:** To equip students with the skill of reading and writing dexterously. By the end of the course the students will be skilled in the art of expressing their ideas in short and long compositions, noting information effectively and summarizing and abstracting more efficiently.

#### **Prescribed Text books:**

- 1. *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.
- 2. The Written Word by Vandana R. Singh, Oxford University Press, New Delhi.

#### **Course Contents:**

#### 1. Reading and Comprehension Skills:

Students will be required to read and comprehend the essays in Unit 3 and 4 of the book *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition. They will be required to answer the questions given after each essay.

#### 2. Writing Skills

Students will be required to learn Paragraph and Essay Writing and Note Making, Summarizing and Abstracting as in the book *The Written Word* by Vandana R. Singh, Oxford University Press, New Delhi.

#### Minor 1:

#### Syllabus to be covered:

- 1. Unit 3 from *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.
- 2. ABC of Good notes, Sub dividing your Notes and Summarizing and abstracting included in the Chapter "Note Making, Summarizing and Abstracting" from *The Written Word*.

#### **Suggested Paper Pattern:**

- 1. Theoretical questions based on ABC of Good notes, Sub dividing your Notes and Summarizing and abstracting included in the Chapter "Note Making, Summarizing and Abstracting" *The Written Word* (8 marks).
- 2. Short answer type questions from Unit 3 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks).
- 3. Essay type question from Unit 3 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks).

#### Minor 2:

#### Syllabus to be covered:

- 1. Abbreviations and Symbols and Note making in practice from the chapter "Note-Making, Summarizing and Abstracting in the book *The Written Word*
- 2. Unit-4 from the book *Making Connections: A Strategic Approach to Academic Reading* by Kenneth J. Pakenham, Second Edition.

#### **Suggested Paper Pattern:**

- 1. A practical question on Note making in practice "Note-Making, Summarizing and Abstracting" from the chapter the book *The Written Word* (8 marks)
- 2. Short answer type questions from Unit 4 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)
- 3. Essay type question from Unit 2 of *Making Connections: A Strategic Approach to Academic Reading* (6 marks)

#### Suggested Paper Pattern for Major Exam:

- 1. Practical Question on Paragraph and Essay Writing as prescribed in *The Written Word* /1 out of 2 (10 marks)
- 2. Short answer type questions from Unit 3,4 of *Making Connections: A Strategic Approach to Academic Reading* (16 marks)
- 3. Essay type question from Unit 3,4 of *Making Connections: A Strategic Approach to Academic Reading* 1 out of 2 (10 marks)
- 4. Practical Question on Note Making from *The Written Word* (8 marks)
- 5. Theoretical Question(s) based on the two chapters from the book *The Written Word* (6 marks)

## PBL-132: ਮੁੱਢਲੀ ਪੰਜਾਬੀ

#### (In lieu of Punjabi Compulsory)

Credits: 2-0-0

#### ਪਾਠ–ਕ੍ਰਮ

- ਪੰਜਾਬੀ ਸ਼ਬਦ-ਬਣਤਰ ਸੰਯੁਕਤ ਅਤੇ ਮਿਸ਼ਰਤ ਸ਼ਬਦ ਬਹੁ-ਉਚਾਰਖੰਡੀ ਸ਼ਬਦ
- 2. ਪੰਜਾਬੀ ਵਾਕ-ਬਣਤਰ ਸਾਧਾਰਨ-ਵਾਕ : ਕਿਸਮਾਂ ਸੰਯੁਕਤ-ਵਾਕ : ਕਿਸਮਾਂ ਮਿਸ਼ਰਤ-ਵਾਕ : ਕਿਸਮਾਂ
- ਪ੍ਰਕਾਰਜੀ ਪੰਜਾਬੀ ਚਿੱਠੀ ਪੱਤਰ ਪੈਰ੍ਹਾ ਰਚਨਾ ਸੰਖੇਪ ਰਚਨਾ ਅਖਾਣ ਅਤੇ ਮੁਹਾਵਰੇ

## ਯੂਨਿਟ ਅਤੇ ਥੀਮ

- ਪੰਜਾਬੀ ਸ਼ਬਦ-ਬਣਤਰ : ਸੰਯੁਕਤ ਸ਼ਬਦ; ਸਮਾਸੀ ਸ਼ਬਦ (ਜਿਵੇਂ ਲੋਕ ਸਭਾ); ਦੋਜਾਤੀ ਸ਼ਬਦ (ਜਿਵੇਂ ਕਾਲਾ ਸਿਆਹ); ਦੋਹਰੇ ਸ਼ਬਦ/ਦੁਹਰਰੁਕਤੀ (ਜਿਵੇਂ ਧੂੜ੍ਹ ਧਾੜ੍ਹ/ਭਰ ਭਰ), ਮਿਸ਼ਰਤ ਸ਼ਬਦਾਂ ਦੀ ਬਣਤਰ/ਸਿਰਜਨਾ; ਅਗੇਤਰਾਂ ਰਾਹੀਂ (ਜਿਵੇਂ ਉਪ ਭਾਸ਼ਾ), ਪਿਛੇਤਰਾਂ ਰਾਹੀਂ (ਜਿਵੇਂ ਰੰਗਲਾ), ਪੰਜਾਬੀ ਸ਼ਬਦ ਰਚਨਾ-2: ਪੜਨਾਵੀਂ ਰੂਪ, ਕਿਰਿਆ/ਸਹਾਇਕ ਕਿਰਿਆ ਦੇ ਰੂਪ; ਨਿੱਤ ਵਰਤੋਂ ਦੀ ਪੰਜਾਬੀ ਸ਼ਬਦਾਵਲੀ-2: ਮਾਰਕੀਟ/ਬਾਜ਼ਾਰ, ਵਪਾਰ, ਧੰਦਿਆਂ ਨਾਲ ਸੰਬੰਧਿਤ।
- 2. ਪੰਜਾਬੀ ਵਾਕ-ਬਣਤਰ : ਕਰਤਾ ਕਰਮ ਕਿਰਿਆ; ਸਾਧਾਰਨ ਵਾਕ, ਬਿਆਨੀਆ, ਪ੍ਰਸ਼ਨਵਾਚਕ, ਆਗਿਆਵਾਚਕ, ਸੰਯੁਕਤ ਅਤੇ ਮਿਸ਼ਰਤ ਵਾਕਾਂ ਦੀਆਂ ਕਿਸਮਾਂ; ਸੁਤੰਤਰ ਅਤੇ ਅਧੀਨ ਉਪਵਾਕ; ਸਮਾਨ (ਤੇ/ਅਤੇ) ਅਤੇ ਅਧੀਨ (ਜੋ/ਕਿ) ਯੋਜਕਾਂ ਦੀ ਵਰਤੋਂ; ਪੰਜਾਬੀ ਵਾਕਾਂ ਦੀ ਵਰਤੋਂ : ਵਿਭਿੰਨ ਸਮਾਜਕ/ਸਭਿਆਚਾਰਕ ਪ੍ਰਸਥਿਤੀਆਂ ਦੇ ਅੰਤਰਗਤ; ਘਰ ਵਿਚ, ਬਾਜ਼ਾਰ ਵਿਚ, ਮੇਲੇ ਵਿਚ, ਸ਼ੌਪਿੰਗ ਮਾਲ/ਸਿਨਮੇ ਵਿਚ, ਵਿਆਹ ਵਿਚ, ਧਾਰਮਿਕ ਸਥਾਨਾਂ ਵਿਚ, ਦੋਸਤਾਂ ਨਾਲ ਆਦਿ।
- 3. ਇਸ ਯੂਨਿਟ ਵਿਚ ਚਿੱਠੀ ਪੱਤਰ (ਨਿੱਜੀ,ਦਫ਼ਤਰੀ,ਵਪਾਰਕ), ਪੈਰਾ ਰਚਨਾਂ, ਸੰਖੇਪ ਰਚਨਾ ਅਤੇ ਅਖਾਣ ਮੁਹਾਵਰਿਆਂ ਦੀ ਵਰਤੋਂ ਰਾਹੀਂ ਵਿਦਿਆਰਥੀ ਦੀ ਭਾਸ਼ਾਈ ਯੋਗਤਾ ਨੂੰ ਪਰਖਿਆ ਜਾਵੇਗਾ।

#### Course Code : ARL-201 Course Title: Building Science-III (Climatology)

## Duration of Examination 3 Hrs Credits : 03 (L=2,T=1,U=0)

**Course Contents:** 

## PART I

**Global Climatic Factors (Tropics):** Basic Elements of Climate, Temperature, Humidity, Wind, Solar Radiation, Vegetation, etc., their measurements and effect. Climate zones and their classification– Tropical Climate, Cool Temperate, Hot–arid, Warm–Humid, etc. Concept of Macro climate and Micro Climate.

**Thermal Qualities:** Heat and Temperature, Solar Factor, Concept of Thermal Comfort, Heat Balance of Human Body, Effective Temperature and Corrective Effective Temperature, C.E.T. Analysis,

## PART II

**Heat Flow through Buildings**. Concept of U-value, Heat Balance Equation of Buildings. Convection, Conduction, Radiation, Conductance, Resistance, Transmittance, etc.

**Solar Radiation / Sun Angles:** Solar Radiation, Position of Sun and methods of Recording it, Solar Penetration inside Buildings, Solar Charts, Solar Azimuth Angle, Solar Altitude Angle, Shadow Angle Protector, Design of Shading Devices – Horizontal and Vertical Shadow Angles and Vertical and Horizontal Shading Devices.

## PART III

**Wind:** Wind Direction and speed and their impact on Design of Window openings, Heating and cooling effect through topography and Orientation of Buildings, Air Pattern inside and Around the Buildings. Position, Placement and size of windows.

**Micro Climate:** Effects of Topography and natural built up surroundings. Human comfort conditions and design of various building element to gain comfort, Site selection Site planning and Orientation of Buildings. Application of All Climatic Factors on the Design of Buildings, Traditional / Vernacular Shelter Design for Various Climatic Zones.

- 1. Konniesberger, ed., "Manual of Tropical Housing", Longman Group. U.K. 2000.
- 2. Olgay, V; "Design with Climate", Princeton University Press, London, 1963.
- 3. Ewans, Martin, "Climatology", MN: Lerner Publications Company, Germany, 1971
- 4. Krishan, Arvind; "Climate Responsive Architecture", Tata Mc Graw Hill, New Delhi.
- 5. Lal. D.S; "Climatology", Sharda Pustak Bhawan, Allahabad, 2001.

## Course Code : ARL–202 Course Title: Theory of Design –I

## Duration of Examination 3 Hrs Credits : 03 (L=2,T=1,U=0)

#### **Course contents:**

## PART I

Theory of design, its scope and application, Elements of design: Mass, space, line, colour, texture, proportions. Principles of design: Rhythm, Balance, Harmony, Contrast, Variety. Objectives of design: Beauty, Order, Efficiency, Usefulness, Economy. Scale: Importance of scale in Architecture, Architectural scale, Human scale and monumental scale. Role of Color in Architecture, Theory of colors, effects and properties of colors, Organization of form & space, Mass space relationship.

## PART II

Introduction to Form, Function and Circulation. Interrelationship of Form, Function and circulation in Architectural design.

Function: Formal & informal function, Zoning, Hierarchy of functions, activity charts and interdependence of form and function, functionalism and concepts of form follows function.

Circulation & Activity: Movement through space, Hierarchy of circulation spaces and linkages, various circulation patterns, Path space relationship and typology of the circulation space, Horizontal & vertical circulation and Movement as part of Activity. Analysis and classification of Circulation: Elements of horizontal and vertical circulation

## PART III

Design Process: Design brief, Area programme analysis, Concept and Design development:

Design objectives, Thrust areas, Design methodology, Design idea and its evolution through design development, 3 dimensional visualization. Contextualization: Historical, Physical, Socio cultural & economic context.

Building types–Residential, Commercial, Institutional, Industrial and Recreational. Architectural character and Style, Study of modern and traditional Iconic buildings

## **Suggested Readings:**

1. Ching, Francis D.K.; "Architecture form space and order", Van Nostrand Reinhold, NY, 1996.

2. Smith, C. Ray; "Interior Design in the 20th Century", Harper & Row, 1986

3. Bunce, Fredrick W.; "The Iconography of Architectural Plans", D.K. Print World, 2002

4. Rompilla, Ethel; "Color for Interior Design", Harry M. Abrams. Inc. Publisher, 2005

## Course Code : ARU–203 Course Title: Architectural Drawing–II

## Duration of Examination 4 Hrs Credits : 05 (L=1,T=0,U=4)

## **Course Contents:**

- I) Perspective (Normal and Birds' eye view):
  - Introduction to basic terms, principles, types and techniques of perspective drawing
  - One and two point perspectives of building forms
  - Sectional Perspectives
- II) Sciography:
  - Introduction to basic principles of sciography and its application in the field of Architecture.
  - Study of shadow of objects on
  - Horizontal surfaces
  - Vertical surfaces
  - Inclined surfaces
  - Curved surfaces
  - Complex surfaces
  - Sciography of buildings/ building components in plan and elevation
  - Sciography applied on the perspectives of the buildings

- 1. D'Amelio, Joseph; "Perspective Drawing Handbook", Dover Publications, New York, 2004.
- 2. Smith, Ray; "Introduction to Perspective", Dorling Kindersley Publishers Ltd., 1999.
- 3. Warren, P.E. & Luzadder, J; "Fundamentals of Engineering Drawing", Prentice Hall, 1977
- 4. Wyatt, William E.; "General Architectural Drawing", Chas. A. Bennett Co., Inc. 1969.
- 5. Bhatt, N.D.; "Engineering Drawing", Charotar; Tenth Edition, New Delhi, 1996.

## Course Code : ARU–204 Course Title: Building Construction –III

## Duration of Examination 4 Hrs Credits : 05 (L=1,T=0,U=4)

## **Course Contents:**

- Various type of floors and floor finishes.
- Various types of wall construction
  - Cavity wall
  - Hollow block wall
  - Dhajji wall
  - Concrete block wall
  - Mud block wall
  - Shear wall
- Different types of staircase and their various construction techniques

## Staircase:

- Dog legged
- Open well
- Spiral
- Helical
- Cantilever

## **Construction Techniques:**

- R.C.C. staircase
- Waist slab
- Folded slab
- Central beam
- M.S. staircase
- Section through a double storied building incorporating the above details.

- 1. Bindra, S.P & Arora, S.P.; 'Text Book on Building Construction", D. R & Sons, 1977.
- 2. Watson, Don A.; "Construction Materials and Processes", McGraw Hill Co., New York 1972.
- 3. Mckay, W.B.; "Building Construction", Vol.1, 2, 3 Longmans, U.K. 1981.
- 4. Alanwerth; "Materials", The Mitchell Pub. Co. Ltd., London, 1986.
- 5. Chudley, R.; "Building Construction Handbook", British Library Cataloguing in Publication Data, London, 1990.
- 6. Barry, R.; "Building Construction", East West Press, New Delhi, 1999.

## Course Code : ARU–205 Course Title: Architectural Design–III

Duration of Examination: 12 Hrs Credits: 08 (L=2,T=0,U=6)

#### **Course Contents:**

- Design of Residential building with small work area like Artist's Cottage, Architect's Residence, Farm House etc.
- Design of Residential complex like Guest House, Hostel, Inn etc.
- Design of a house for physically challenged as per norms of the barrier-free environment.

- 1. Chiara, Joseph De; "**Time Saver Standards for Building types**", McGraw–Hill Professional Publishing. 2001
- 2. Neufert, Ernst; "Architect's Data", 3rd Edition, Wiley–Blackwell, U.K., 2012.
- 3. Ching F.D.K; "Design Drawing", Van Nostrand Reinhold, 1998.
- 4. Smith P.F.; "Architecture and the Human Dimension", George Baldwin Ltd, 1979.
- 5. Ching F.D.K; "A Visual Dictionary of Architecture", Van Nostrand Reinhold, 1997.

## ESL 220 Environmental Studies (Compulsory Paper)

## Credit 3-0-0

- **1. The Multidisciplinary Nature of Environmental Studies:** Definition, scope & its importance, Need for public awareness.
- 2. Natural Resources: Natural resources and associated problems.
  - a) **Forest Resources**: Use of over exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forests and tribal people.
  - **b)** Water Resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems.
  - c) Mineral Resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies.
  - d) **Food Resources**: World food problems, change caused by agriculture and overgrazing, effects or modern agriculture, fertilizer-pesticide problem, salinity, case studies.
  - e) Energy Resources: Growing of energy needs, renewable and non-renewable energy resources, use of alternate energy sources, case studies.
  - f) Land Recourses: Land as a resource, land degradation, soil erosion and desertification.
  - g) Role of an individual in conservation of natural resources, Equitable use of resources for sustainable lifestyles.

#### 3. Ecosystem:

Concept of an ecosystem, Structure and function of an ecosystem, Producers, consumers and decomposers, Energy flow in the ecosystem, Ecological succession, Food chains, food webs and ecological pyramids.

Introduction, types, characteristic features, structure and function of the following ecosystems:

- a. Forest ecosystem
- b. Grassland ecosystem
- c. Desert ecosystem
- d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries).

## 4. Biodiversity and its Conservation:

**Definition:** Genetic, species and ecosystem diversity, Biogeographical classification of India. **Value of Biodiversity**: Consumptive use; productive use, social, ethical, aesthetic and option values.

Biodiversity of global, National and local levels, India as mega-diversity nation "Hot-spots of biodiversity.

**Threats to Biodiversity**: Habitat loss, poaching of wild life, man wildlife conflicts Endangered and endemic species of India.

Conservation of Biodiversity: In situ and Ex-situ conservation of biodiversity.

#### 32

#### Bachelor of Architecture (B.Arch.) (Semester-III) (Under Credit Based Continuous Evaluation Grading System)

## 5. Environmental Pollution:

Definition, Causes, effects and control measures of:

- a) Air Pollution
- b) Water Pollution
- c) Soil Pollution
- d) Marine Pollution
- e) Noise Pollution
- f) Thermal Pollution
- g) Nuclear Hazards

**Solid Waste Management**: Causes, effects and control measures of urban and industrial wastes. Role of an individual in prevention of pollution.

Pollution case studies Disaster Management: Floods, Earthquake, Cyclone and Landslides

#### 6. Social Issues and Environment:

- \* From unsustainable to sustainable development
- \* Urban problems related to energy
- \* Water conservation, rain water harvesting, watershed management
- \* Resettlement and rehabilitation of people; its problems and concerns. Case studies
- \* Environmental ethics: Issues and possible solutions.
- \* Climate change, global warning, acid rain, ozone layer depletion, nuclear accidents and holocause. Case studies.
- \* Wasteland reclamation
- \* Consumerism and waste products
- \* Environmental Protection Act
- \* Air (prevention and Control of Pollution) Act
- \* Water (prevention and Control of Pollution) Act
- \* Wildlife Protection Act
- \* Forest Conservation Act
- \* Issues involved in enforcement of environmental legislation
- \* Public awareness

#### 7. Human Population and the Environment

- \* Population growth, variation among nations
- \* Population explosion-Family welfare programme
- \* Environment and human health
- \* Human rights
- \* Value education
- \* HIV / AIDS
- \* Women and child welfare
- \* Role of information technology in environment: and human health
- \* Case studies
- \* Road Safety Rules & Regulations: Use of Safety Devices while Driving, Do's and Don'ts while Driving, Role of Citizens or Public Participation, Responsibilities of Public under Motor Vehicle Act, 1988, General Traffic Signs
- \* Accident & First Aid: First Aid to Road Accident Victims, Calling Patrolling Police & Ambulance

#### 8. National Service Scheme

- Introduction and Basic Concepts of NSS: History, philosophy, aims & objectives of NSS: Emblem, flag, motto, song, badge etc.; Organization structure, roles and responsibilities of various NSS functionaries.
- Health, Hygiene & Sanitation: Definition, needs and scope of health education; Food and Nutrition; Safe drinking water, water borne diseases and sanitation (Swachh Bharat Abhi-yan); National Health Programme; Reproductive health.
- **Civil/Self Defense:** Civil defense services, aims and objectives of civil defense; Needs for self defense training.
- **9. Field Work:** Visit to a local area to document environmental assets-river / forest / grassland / hill / mountain. Visit to a local polluted site-Urban / Rural / Industrial / Agricultural. Study of common plants, insects, birds. Study of simple ecosystems-pond, river, hill slopes, etc. (Field work equal to 5 lecture hours)

## Course Code: ARL–251 Course Title: Theory of Structures –II

## Duration of Examination 3 Hrs Credits: 03(L=2, T=1, U=0)

#### **Course Contents:**

## PART I

Introduction to different methods used for the design of reinforced concrete structures, working stress method, ultimate load method, limit state method, types of limit states, characteristic values, design values, factored load, comparison of limit state and working stress methods of design.

Design of singly reinforced beams, doubly reinforced beams, cantilever beams; depth thickness of section, area of reinforcement steel, shear check, shear reinforcement, deflection length check, design examples Introduction to T beams and L beams. Effect of continuity of beams

#### PART II

Introduction to various types of slabs and difference b/w one way and two way slab. Design of one way slab; thickness of section, area of reinforcement, shear check, deflection check and design examples. Design of two way slab; IS 456:2000 codal provisions, various checks and design examples. Effects of continuity of slabs.

#### PART III

Design of columns; long and short columns, basic equation of design IS 456 code provisions, section of column, longitudinal and lateral reinforcement. Types of footings, Design of isolated square and rectangular footing, depth of footing from one way shear criterion, from two way shear criterion (punching shear and from bending moment criterion., Area of reinforcement and design examples.

- 1. Ramamurthan, S; "Design of Steel Structures", 7th Edition, Jain Book Agency Publishers, New Delhi, 2010.

- 7. Duggal, S.K.; "Design of Steel Structures", Tata McGraw Hill, New Delhi, 2009.

## Course Code : ARL-252 Course Title: Building Science-IV (Lighting & Acoustics)

## Duration of Examination 3 Hrs Credits : 03 (L=2,T=1,U=0)

#### **Course Contents:**

#### PART I

Architectural lighting, Aesthetics and functions, concept of daylight and interior light, calculation of luminance and glare.

Luminaire design, types of luminance and their application, luminance light source, calculation of day light factor, illustrations required for various types of buildings such as residential, industrial, educational, recreational, health and cultural buildings.

#### PART II

Fundamentals of sound – terminology, Principals of transmission and passage of sound. Factors influencing hearing conditions– Shapes, layouts, Sitting arrangements of Auditoriums, Lecture Halls, Multipurpose halls, Reverbration, reflection and absorption of sound Reverbration time, Accoustical defects– Echo, Dead spot, sound foci, etc.

#### PART III

Structure and air borne sound, sound absorption–coeff of different materials, classification and selection of various materials for acoustical correction, Materials of sound insulation for different nature of problem and circumstances.

Acoustical design of Class rooms, Lecture rooms, Multipurpose halls, Conference rooms, Auditorium etc. Calculation of Reverberation time and time delay.

Course Code : ARL-253 Course Title: History of Architecture-II Duration of Examination: 3 Hrs Credits: 03 (L=2,T=1,U=0)

# **Course Contents:**

# PART I

Early Christian Architecture and Byzantine Architecture Development of Romanesque Architecture in Italy, Central Europe, France

# PART II

Development of Gothic Architecture in France, Great Britain, Italy Development of Renaissance Architecture (Early Renaissance, High Renaissance and Mannerism) in Italy.

# PART III

Development of Baroque Architecture in Italy.

Development of Renaissance Architecture in Britain

Influence of new building materials and technology on the development of architecture during Industrial Revolution.

Course Code : ARU-256	<b>Duration of Examination 4 Hrs</b>
<b>Course Title: Building Construction - IV</b>	Credits : 05 (L=1,T=0,U=4)

#### **Course Contents:**

- Introduction to the various types of pitched roofs and their terminology.
- Various type of steel trusses and roof coverings

	Steel trusses	<b>Roof coverings</b>
	– Flat	– A.C. Sheets
	– Bow string	– G.I. sheets
	– North light or saw tooth	– Fiberglass
1.	Waterproofing of roofs, walls and baser	nents (Materials & Techniques)

- 2. Expansion joints in buildings
- 3. Temporary supporting structures
  - a. Form work/shuttering (Pneumatic)
  - b. Scaffolding
  - c. Shoring & underpinning
- 4. Various type of wall cladding
  - a. Glass wall with patch fittings
  - b. Aluminum Composite panels
  - c. Stone (Red sand stone/slates/granite/marble)
  - d. Tile (brick/ vitrified)Grit block finish

- Bindra, S.P & Arora, S.P. "Text Book on Building Construction", National Book Trust, India, 1986
- 2. Watson, Don A. "Construction Materials and Processes", McG.raw Hill Co., 1972.

Course Code : ARL-258Duration of Examination : Viva VoceCourse Title: Computer ApplicationsCredits : 02 (L=2,T=0,U=0)

#### **Course Contents:**

# PART I

Introduction to AutoCAD – Basics of Computer Aided Design, Application of AutoCAD in Architecture. Drafting using various co–ordinate systems–absolute, relative & polar relative.

#### PART II

Preparation of 2–D Drawings, use of various drawing commands for 2–D drawings generation and editing commands for modification of drawings. Application of layers.

#### PART III

3–D modeling – Use of various commands for 3–D solid and surface modeling. 3–D Editing commands.

Rendering of isometric views using various rendering commands

Use of layouts, concepts of x-ref, Preparation of rendered 3-D drawing projects

- 1. Goldenberg, Joseph; "AutoCAD Architecture 2010 Comprehensive Tutorial", Autodesk, 2010.
- 2. Aubin ,Paul F; "Mastering Auto CAD Architecture", 2010.
- 3. Elise, Moss , "Autodesk AutoCAD Architecture 2013 Fundamentals", SDC Publications, USA, 2013.
- 4. Gill, P.S.; "Engineering Graphics and Drawing", S.K. Kataria & Sons , New Delhi, 2010.

Course Code: ARF-259 Course Title: Project Oriented Study Tour Duration of Examination: Viva Voce Credits: 02 (L=0, T=0, U=2)

**Objective:** The main aim is to explore, study , analyze and understand the contemporary/traditional/ historical architectural characteristics and details of areas, places, buildings in different parts of India and abroad.

The students shall visit places as recommended by the teachers-in-charge and approved by BOC. The tour shall be of one to two weeks of duration.

#### **General Guidelines for the Teacher**

Study of building materials and details through sketches and photographs to be made as an individual student activity and is to be submitted in a report form. Study of concepts/ construction techniques and architectural characters for different sites/ buildings visited to be submitted in groups of students. Viva voce of individual student for both the submissions will be conducted by the teacher in-charge, who accompanied the tour, as part of the evaluation.

# Course Code : ARL-301 Course Title: Structure Systems

Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

#### **Course-contents:**

# PART I

#### **Bulk Active Structure System:**

Concept, development, laws of formation, Spans, Examples, merits and demerits, Slabs (one way and two way, Flat slab, Waffle slab), Beams (Simply supported, Cantilever, Continuous, Vierendeel Girders), Grid (skew and square).

#### PART II

#### Form Active Structure System

Concept development, laws of formation, Spans, Examples, merits and demerits, Funicular structures (Cables and Arches)

Tents, Pneumatic structures

#### **Vector Active Structure System**

Concepts, development, laws of formation, Spans, Examples, Merits and demerits, Trusses, Space frames, Geodesic Dome.

#### PART III

#### Surface Active Structure System:

Singly curved shells, Doubly curved shells, Hyperbolic paraboloids, Folded plates

#### Introduction to foundation types

- 1. Dayarathnam, P. "Pre-stressed Concrete Structures", Oxford and IBM Publishing Co., New Delhi, 1982.
- 2. Schueller, Wolfgang; "High Rise Building Structures", John Wiley & Sons., New York, 1976.
- 3. Otto, Frei.; "Pneumatic Structures", Vol., 2, Cable Structures. The MIT Press, London.
- 4. Subramaniam, N.; "Principles of Space Structures", Wheeler & Co., Allahabad, 1983.
- 5. Schodek, Daniel. "Structures", Prentice Hall of India, New Delhi, 2004.
- 6. Engel, Heino; "Structures System", Hatje Cantz Verlag, 2007.

# Course Code : ARL-302 Course Title: Building Services - I

# Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

# PART I

- Importance and necessity of water supply schemes: Flow diagram
- **Quantity of Water**: Types of demands, domestic, commercial, industrial water demand, fire demand, per capita demand, prediction of population, hydrologic cycle, rainfall and run off, rainfall measurement.
- Sources of Water Supply: Surface sources, ground sources.
- **Collection of Water**: Different types of intakes, conveyance of water, pipe conduits, types of pipe materials, pipe joints
- Quality of Water: Impurities in water, Hardness in water, Standards of water quality
- Purification of water: Methods of treatment, sedimentation, filtration. Disinfection of water

# PART II

- Water Distribution System: Classification of distribution, pressure in distribution systems, storage and distribution resources, layout of distribution system, appurtenances, water supply plumbing –individual buildings, fixtures and water storage in building.
- **Hot Water supply**: Hot water supply in single and multistoried buildings with special reference to National Building Code.

# PART III

# • Sewerage and Sewage Disposal:

Basic definitions, methods of sewage Collection, types of sewers, and their layout, classification of sewerage system, sewer sections, sewer materials and joints, sewer appurtenances. Storm water determination and its drainage.

• Drainage of Buildings:

Principles of Building drainage, Different types of pipes, traps, sanitary fittings, plumbing systems of drainage: Single stack system, one pipe system, two pipe system, pipe sizes and gradients. Complete Layout of Water supply and sanitary system in a building.

• **Disposal in un-sewered areas:** Different types of pits, septic tank, design of septic tank, disposal of septic tank effluent. Brief description about analysis of sewage, Oxygen demand, Natural methods of sewage disposal

43

# Course Code : ARL–303 Course Title: Theory of Design – II

Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

#### **Course Contents:**

#### PART 1

Introduction to Modern Architecture, Reasons for evolution of modern architecture, origins – Neoclassicism and Revivalism – works of Ledoux and Boullee Durrand. Socio–Cultural and Technical transformations that led to Advent of Modern Architecture. Arts & Crafts in England, Willium Morris, Structure Rationalism & influence of Violet Le Duc, Art Nouveu – Victor Horta, Antonio Gaudi

#### PART 1I

The design philosophy and exemplary works of Louis Sullivan and Frank Lloyd Wright – the evolution of their philosophy through various stages of early works, midlife and late years. The principles of organic Architecture. Walter Gropius and Mies Van Der Rohe , New –Conception of Spaces, Paul–Ruddlph Brutalism. Aalvar Aalto–Spatial Compositions and Abstract Masses. The design philosophy & exemplary works of Le Corbusier. Pluralism in the 1970s, The exemplary works and design philosophy of Eero Saarinen, John Utzon, Louis I Kahn, Philip Johnson. Elementary reference to Post – Modernism in the west, Works of Venturi, Rossi, Michel Graves

#### PART III

Post Independence influence of Modern Masters, Corbusier and Kahn in India. Indian Modern Architects. A.P. Kanvinde, Joseph Allen Stein, Charles Correa. Balkrishna Doshi (early works). Regionalism – Raj Rewal, Late works of Doshi and Laurie Baker. Globalization and its impact on India, rise of Indian and Multi–National corporations and their architecture.

Course Code: ARU-304
<b>Course Title: Building Construction-V</b>

Duration of Examination: 4 Hrs Credits: 05 (L=1,T=01,U=4)

# **Course Contents:**

Steel and aluminum doors, windows and glazing, Panel steel (Box section)

- Special doors and their detailing like:
- Sliding
- Sliding and folding
- Collapsible
- Rolling shutter (curtain lath + curtain rods)
- Pivoted
- 1. Partitions (glass bricks, wooden, board), Paneling (board, fiber-sheet, polycarbonate sheet) and false ceiling (gypsum board, Pop, aluminum section, plywood, canvas)
- 2. Introduction to partitions for large span structures e.g. convention centre
- 3. Cupboards, cabinets, counters and showcase/Display windows
- 4. Construction details of an interior like office, showroom, etc. incorporating the above details.

- 1. Kumar, Sushil; "Building Construction", Standard Publishers & Distributors, 1986
- 2. Ching, D.K. Francis; "Building Construction Illustrated", CBS Publishers & Distributors, New Delhi, 1999.
- 3. Chudley, R.; "Building Construction Handbook", British Library Cataloguing in Publication Data, UK, 2004.

- 4. Thomas A. Heinz; "Frank Lloyd Wright's Public Buildings", Gramercy Books, 2002.
- Chris Van Uffelen and Chris Van Uffelen; "Contemporary Museums: Architecture History – Collections", Braun Publishing Agency, Switzerlan

# Course Code : ARL-306 Course Title: Theory of Structure – III

Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

# **Course-contents:**

# PART I

Type of walls, Design of columns and walls in masonry; allowable stresses, cross sectional area factor, shape factor, slenderness ratio, effective height/ length, effective thickness, load factor and design examples. Design of foundations in masonry work, loads on foundation, safe bearing capacity, depth of foundation, Rankin's formula, section of footing and design examples. Retaining walls in masonry, loads, resultant pressure, conditions for stability of structures, middle third rule, design examples.

#### PART II

Introduction to steel structures and various steel sections. Design philosophy, principles of limit state method of design. Connections, Riveted, bolted and welded connections, types of bolted joints, various failures and efficiency of joint and numerical examples. Welded connections different types of welds, advantages and disadvantages including, design of welded joints.

# PART III

Behaviour of compression members subjected to axial loading, effective length, radius of gyration, slenderness ratio, permissible stresses and design examples. Behaviour of tension members, Design strength due to yielding of gross cross-section, due to rupture of critical section and due to block shear. Behaviour of steel beams, web buckling and web crippling, design procedure, shear check and deflection check.

- 1. Anand S. Arya, "Masonry and Timber Structures" Name of Publisher "Nem Chand and Brothers, 2006".
- 2. Frederick Putnam Spalding "Masonry Structures" Name of Publihser: Bibliolife, 2008.
- Bhavikatti, S.S. Design of Steel Structures by Limit State method of design., I.K.International publishing House Pvt. Ltd.2010
- 4. Sheykar, M.R. Limit State Design in Strucrural Steel, PHI learning Pvt. Ltd. 2010.
- 5. Chandra, Ram. Design of Steel Structures. Standard Books, 1970.
- 6. Dayratnam, P. Design of Steel Structures. S. Chand, 2008.
- 7. Arya and Ajmani, Design of Steel Structures. Nem Chand, 1974.
- 8. Duggal, Design of Steel Structures. Tata Magra Hill 2009.

49

Bachelor of Architecture (B.Arch.) (Semester-V) (Under Credit Based Continuous Evaluation Grading System)

Course Code: ARL–307 Course Title: Surveying & Leveling Duration of Examination 3 Hrs Credits: 03 (L=2, T=1, U=0)

# **Course Contents:**

# PART I

# LINEAR MEASUREMENTS

Different methods, Instruments for Chaining, Ranging out survey lines, chaining, chain triangulation. Field Book, Field work, Instrument for setting out right angles, Obstacles in chaining, introduction to total station survey; methods and specifications.

# COMPASS SURVEYING

Bearing & angles, Theory of magnetic compass, Prismatic compass magnetic declination and local attraction.

# PART II

# PLANE TABLE SURVEYING

General: Accessories, Working operations, methods of plane tabling. Intersection, Traversing, Resection, 3 point problems, Errors in plane tabling, Advantages & disadvantages of plane tabling.

# CONTOURING

Contour interval, Characteristics of contours, Interpolation of contours, contours gradient, Use of contours maps, computation of volume of earth from contour plans, calculation of Areas, Use of Planimeter.

# PART III

# LEVELING

Definitions, methods of leveling, dumpy level, leveling staff, Temporary adjustment of a level, Theory of direct leveling, Differential leveling, Booking & Reducing levels, Balancing B.S.& F.S., Cross sectioning. Theodolite & its structure, Definition & terms, Measurements of horizontal angles.

- 1. Punmia, B.C. "Surveying and Levelling" by Laxmi publication.
- 2. Duggal, S.K. "Text Book of Surveying" Published by Tata McGraw–Hill ninth reprint 2008.
- 3. Clendinning & Oliver, "Surveying" published for the Institutes of Surveyors in Queensland, New South Wales, Victoria, South Australia, Western Australia and Tasmania by the Queensland Institute of Surveyors.
- 4. Arora, K.R. "Principles & use of Surveying Instruments"

# Course Code : ARL-351 Course Title: Building Services - II

# Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

#### **Course Contents**

# PART I

#### Electrical

Basic principles of electrical circuits; Ohm's and Kirchoff law. Calculation of power load distribution for residential buildings. Bulk supply system and location of campus transformers. Introduction to electrical fittings and electrical appliances. Systems of electrical wiring commonly

used. Wires specification and current carrying capacity.

#### PART II

#### **Mechanical: Fire Fighting**

Classification of fire, classification of building according to fire load, causes and spread of fire. Combustibility of material and fire resistance provision in buildings from fire safety angle. Fire fighting equipment and types of fire extinguishers. Fire protection, means of escape – fire detection and alarm systems, heat and smoke detectors, fire dampers, fire doors, water curtains, etc. Comparison of detectors. Mechanical and Communication systems.

#### PART III

#### **Mechanical: Conveyor Lifts**

Principles of functioning, control and operation of lifts. Machine room and its equipments, lift well and pit. Ideal location, ventilation, number and size of life cars. Escalator functioning – installation and suitability of escalators. Inter–communication and monitoring devices – System and equipment.

#### **Air Conditioning**

Introduction & basic principles of air conditioning, difference between air cooling and air conditioning. Requirements of comfort conditions, control of temperature, and humidity. Means of mechanical ventilation. Various systems of air conditioning and equipment required for air conditioning like blowers and exhaust fans, fan coil units (FCU) and air handling units (AHU) etc.

- 1. Jain, V.K; "Handbook of Designing and Installation of Services in Building Complex", Khanna Publisher, New Delhi, 1998.
- 2. Gupta, J.B; "Electrical Installation, Estimating and Costing", S.K. Kataria & Sons, New Delhi , 2002.
- 3. Hammer, Mark J; "Water-supply and Pollution-control", Prentice-Hall Higher-Education, 2008.

Course Code: ARL-352 Course Title: History of Architecture-III Duration of Examination: 3 Hrs Credits: 03 (L=2,T=01,U=0)

#### **Course Contents:**

#### PART I

Emergence of early Indo Islamic style of Architecture under the different Muslim dynasties. Early Turkish Sultans, Khilji, Lodhi, Tughlaq, Sayyiads. Architecture of tombs, mosques, forts, palaces, and cities. Study of concepts, spatial forms, and elements of architecture. Islamic Architecture in Northern & Southern Provinces. Emphasis on Golconda, Bijapur, Bidar, Gulbarga, etc. Study of Architectural principles and elements in all major structures.

#### PART II

Architecture in Mughal period. Study of major structures in Delhi & Agra. Emphasis on town planning of Mughal cities. Analysis of tombs, mosques, forts & palaces made during Mughal era.

#### PART III

Sikh Architecture –Architecture of Gurudwaras with special emphasis on Golden Temple, Development of Sikh Architecture in Punjab. Planning of Sikh cities. Study of various structures and their elements.

Colonial Architecture in India under the British Raj with special emphasis on Architecture of New Delhi, Calcutta, and Bombay.

- 1. Nath, R., "History of Mughal Architecture", Abhinav Publications. New Delhi, 1985.
- 2. Arshi, P.S., "Sikh Architecture in Punjab", Intellectual Publishing House. New Delhi, 1985.
- 3. Sahai, Surinder, "Indian Architecture Islamic Period 1192–1857", Prakash Books, New Delhi, 2004.
- 4. Tadgell, Christopher, "The History of Architecture in India", Phadion Press Limited. 1994.
- 5. Habib, Irfan; "Medieval India the Study of a civilization", National Book Trust. 2008.
- 6. Dogra, Ramesh Chander. Dogra, Urmila; "The Sikh World– An Encyclopedia Survey of Sikh Religion and Culture", UBSPD Publishers. 2006.

- 8. Grover, Satish; "Islamic Architecture in India", Galgotia Publishing Company, New Delhi, 1996.

# Course Code: ARL-353 Course Title: Landscape Architecture

Duration of Examination: 3 Hrs Credits: 03 (L=2, T=01, U=0)

#### **Course Contents:**

#### PART I

Introduction: Definition, objective, scope and relevance of Landscape Architecture, Global and local environmental issues; Ecology: meaning and relevance of its study, building as a component in the ecological set up. Garden styles – formal and informal; History of garden styles viz. Italian, French, Persian, Mughal and Japanese.

#### PART II

Site Planning: meaning, purpose and methodology; site surveys: types, relevance, components; Functional and technical factors in site planning; Principles and goals of landscape design; types of landscape styles – hard and soft landscape, wet and dry landscape. Landscape design elements: types, materials, use and relevance. Hard and soft landscape, water as an important element,

#### PART III

Plants: Functional, aesthetic and environmental aspects of plant; Types and forms of plants; criteria for plant selection; characteristics (height, foliage, flowering etc.) of various plants, their common and botanical names. Preparation of a landscape scheme. Landscape project at house level, neighborhood level etc.

- 1. Rogers, Elizabeth Barlow; "Landscape Design: A cultural and Architectural History", First Edition. Harry N. Abrams, 2001.
- 2. Sullivan, Chip, Boult Elizabeth. Illustrated history of Landscape design, John wiley & Sons, 2010.
- 3. Swaffield, Simon.R.. "Theory of Landscape Architecture", A Reader. University of Pennsylvania Press, 2002.
- 4. Booth, Norman. K.. "Basic elements of Landscape architectural design", Waveland Press, 1989.
- 5. Ingels, Jack E. "Landscaping: Principles and Practice", Publishers Delmar Cengage Learning, USA, 2004.
- 6. Laurie, Michael. "An Introduction to Landscape Architecture", American Elsevier Publishing Co., USA, 1961.
- 7. Randhawa, M.S; "Flowering Trees", Indian Council of Agricultural Research, India, 1957.

- 11. John L. Motloch; "Introduction to landscape design", John Wiley & Sons; 2nd Edition, 2000.

# Course Code : ARU-354Duration of Examination : 3 HrsCourse Title Building Construction VICredits : 05 (L=1,T=00,U=04)

#### **Course Contents:**

- Working Drawings of a residential unit incorporating the following details:
  - Demarcation plan
  - Foundation details
  - Working/ dimension s at all floor levels.
  - Terrace plan
  - Elevations/ Sections
  - Joinery Details
  - Toilet Details
  - Kitchen Details
  - Staircase Details
  - Electrical Plan
  - Plumbing/ sanitary layout
- Appraisals of Commercial Kitchens in Hotels/ Hostels etc.
- Case studies/ detailing of Public Toilets

- 1. Watson, Don A; "Construction Materials and Processes", McGraw Hill Co., University of Michigan, 1972.
- 2. McKay, W.B. "Building Construction", Vol. 1,2,3,4, Longmans, U.K., 1981.
- 3. Alanwerth, "Materials", The Mitchell Pub. Co., Ltd. London, 1986.
- 4. Chudley, R. "Building Construction Handbook", British Library Cataloguing in Publication Data, London, 1990.
- 5. Barry, R. "Building Construction", East West Press, New Delhi, 1999.

Course Code : ARU–355 Course Title: Architectural Design VI Examination: Viva voce Credits : 8 (L=2,T=0,U=06)

#### **Course Contents:**

- Design of I.T. Park/Shopping Mall
- Design of 200 bedded hospital/factory
- Design of Stadium/Gymnasium

- 1. Chiara, Joseph De; "Time Saver Standards for Building types" McGraw-Hill Professional Publishing. 2001
- 2. Neufert, Ernst, "Architect's Data" 3rd Edition, Wiley-Blackwell, UK, 2002.
- 3. Geraint John & Rod Sheard, "Stadia, A Design and Development Guide", Architectural Press, University of Michigan, 2000.
- 4. Michelle Provoost, Matthijs Bouw & Camiel van winkel; "The Stadium: Architecture of Mass Sport", Rotterdam : NAI Publishers, 2000.

Course Code : ARF-356	<b>Duration of Examination :viva voce</b>
Course Title Project Oriented Study Tour	Credits : 02 (L=0,T=0,U=2)

**Objective:** The main aim is to explore, study , analyze and understand the contemporary/traditional/ historical architectural characteristics and details of areas, places, buildings in different parts of India and abroad.

The students shall visit places as recommended by the teachers-in-charge and approved by BOC. The tour shall be of one to two weeks of duration.

#### **General Guidelines for the Teacher**

Study of building materials and details through sketches and photographs to be made as an individual student activity and is to be submitted in a report from. Study of concepts/ construction techniques and architectural characters for different sites/ buildings visited to be submitted in groups of students. Viva voce of individual student for both the submissions will be conducted by the teacher in-charge, who accompanied the tour, as part of the evaluation.

# Course Code : ARL–357 Course Title: Building Specifications, Estimating and Costing

Duration of Examination 3 Hrs Credits : 03 (L=2,T=01,U=0)

#### **Course Contents:**

#### PART I

Definition, scope and importance of specification in the building activities, Art of writing specifications of material and construction works along with emphasis on the quality of the materials and proper sequence of construction works, method of writing correct order and sequence of use of materials. Uses of standard specifications drafted by CPWD, PWD etc. Writing detailed specification for various building materials. Various test and properties related like bricks, Concrete, Cement, lime, sand, various types of mortars, timber, glass, etc.

#### PART II

Writing detailed specification for various construction works like earthwork for foundations, Brickwork, R.B. work, R.C.C. work, plastering and pointing, various types of flooring, white washing, distempering and painting, roof terracing, stone masonry.

Introduction to Estimates, types of estimate approximate and detailed methods of approximate estimating, plinth area methods, carpet floor area method, cubic content methods, approximate content method and number system.

#### PART III

Use of Microsoft Excel for estimating detailed estimate, procedure of estimating, taking out quantities, bill of quantities, schedule of rates.

Exercise in estimation of small buildings, Rate Analysis: Principles and analysis of different rate of labour and material, exercises in rate analysis of different building works i.e. Earth work for foundation, flooring. Introduction to P.W.D accounts procedure as per Common Schedule of Rates. **Suggested Readings:** 

- 1. Dutta, B.N; "Estimating and Costing", UBSPD Pvt. Limited, New Delhi (2009)
- 2. S.C. Rangwala; "Elements of Estimating and Costing", Charoter Publishing House, Gujarat.
- 3. W.H. King and D.M.R. Esson; "Specification and Quantitative for civil Engineers", The English University Press, Ltd.
- 4. "T.N. Building Practice", Vol., 1, Civil, Govt. Publication.
- 5. "P.W.D. Standard Specification", Govt. Publication.
- 6. "C.P.W.D. Standard Specifications", Govt. Publication.
- Chakarborti. M; "Estimating, Costing, Specification and Valuation in Civil Engineering," M. Chakraborti, Kolkatta, 1990.
- 8. "National Building Code", 2005.
- 9. "PWD Schedule of Rates", 2010.

57

Bachelor of Architecture (B.Arch.) (Semester-VII) (Under Credit Based Continuous Evaluation Grading System)

Course Code : ARE-401	<b>Duration of Examination: Viva Voce</b>
<b>Course Title : Practical Training</b>	Credits : 20

#### **Periods per Week:**

The total period of practical training will be of 24 weeks.

# Internal Assessment:25%Internal Assessment shall consist of periodical reports as given below:1.1. Joining Report2.2. Monthly Progress reports (6nos.) 20 marks each.

#### **University Examination**

University examination shall consist of:

1.	Study of building	25%
2.	Final Viva–Voce	50%

#### **Study of Building:**

This includes a building design analysis for a study report which the students are required to do in extra office hours. The study should comprise of multifaceted aspects of any building or a complex in the final stage of construction. This shall put under following heads:

1. Design Concept	2. Space Usage	3. Circulation
4. Climate responsiveness	5. Façade Treatment &	t Architectural Expression
6. Built in Furniture	7. Services	8. Construction Techniques
9. Materials used etc.	10. Conclusions	

#### Viva Voce:

The following work done by students during the office hours must be submitted: Drafting, Tracing, Perspectives, Models, Submission Drawings, Working drawings, drawings and details.

#### Note:

- i. The maximum number of blue prints to be submitted at the time of viva–voce is restricted to 16. Such prints shall be attested by the employer. The prints should cover the important projects done during the training.
- ii. At least one complete project of any nature should form part of submission, the drawings and site supervision of which should have been handled by the students.
- iii. The final viva voce will be conducted by the jury consists of the Head of the department/nominee of the Head and external examiner/s outside the department.

Course Code : ARL-451 Course Title: Housing Duration of Examination: 3 Hrs Credits: 03 (L=2,T=01,U=0)

#### **Course Contents:**

#### PART I

 Definition of house and housing, housing typology – detached, semi-detached, row housing, walk up apartments, multi-storeyed housing, plotted and flatted development; housing densitygross and net density, role of density indices and measures in housing layout.

#### PART II

- Housing as a major component of a settlement, neighborhood concept-definition, Radburn layout, Clarence Perry's principles of layout, physical elements, community facilities, design criteria, selection of housing types, circulation etc. Garden city concept, concept of sustainable housing.
- Housing standards-meaning, purpose & criteria, standards prescribed by HUDCO, NBC etc.

#### PART III

- Problems of slums and housing for the poor-definition of slums, factors responsible for creation, features, Govt. schemes for improvement; low cost housing-meaning and role for housing the poor, low cost materials and techniques, use of local materials, Approach of Laurie Baker, HUDCO (Building Centres), CBRI and others.
- Techniques of appraisal of housing enclaves, physical, social, economic and environmental components; surveys definitions, importance, types, advantages, disadvantages, sample, sampling, preparation of questionnaire–types, sequence and format of questions

- 1. Rangwala, S.C. "Town Planning", Charotar Publishing House, New Delhi, 2009
- Gallion, A.B. & Eisner, S. "Urban Pattern: City Planning and Design", Van Nostrand, New York, 1975
- 3. Christoper, Alexander, "A Pattern Language", Oxford University Press, New York, 1977
- 4. Lynch, Kevin. "City Sense and City Design", MIT press 1990
- 5. Unterman, Richard & Small, Robert. "Site Planning for Cluster Housing", Van Nostrand Publishers, New York, 1977
- 6. Schoenauer, Norbert. "6000 Years of Housing", W. W. Norton & Company, New York, 2000.

Course Code : ARL-452 Course Title : Urban Design and Conservation Duration of Examination: 3 hrs Credits: 03 (L=2,T=1,U=0)

#### **Course Contents**

#### PART I

Introduction to Urban Design theory, raw materials of Urban Design i.e. districts, nodes, landmarks, edges and paths. Determinants of Urban Form – scale, texture, grain and activity patterns. Building typology and its impact on urban forms and merging boundaries of Architecture and Urban Design.

#### PART II

The role of urban conservation and relevance of historic areas in present concept, issues related with physical deterioration of built heritage and its preservation, concepts and policies of conservation of built environment, the role of various international and national agencies. An Urban Design study of built environment of historical/ new developments covering various aspects such as imageability, morphology and legislation etc.

#### PART III

The shape and structure of cities- pattern, styles and trends in history, urban design tools- policy design and legislative tools, bye laws, concepts and practices understanding urban design models.

- 1. Bacon, Edmund N., "Design of Cities", Thames and Hudson, London, 1967.

# Course Code : ARU-454 Course Title : Building Construction VII

Duration of Examination: 4 hrs. Credits: 05 (L=1,T=0,U=4)

# **Course Contents:**

- Details of lift slab and slip form method of construction
- Detailing of curtain walls and wall claddings.
- Construction details of prefabricated and precast building components
- Construction details for earth quake resistant structures (low rise)
- Different types of foundations for buildings
- Swimming pool details types/materials/construction techniques/services

- 1. Watson, Don A;"Construction Materials and Processes", McGraw Hill Co., University of Michigan, 1972.
- 2. Mckay, W.B. "Building Construction", Vol.1, 2, 3 Longmans, U.K. 1981.
- 3. Alanwerth, "Materials", The Mitchell Pub. Co. Ltd., London, 1986.
- 4. Chudley, R; "Building Construction Handbook", British Library Cataloguing in Publication Data, London, 1990.
- 5. Barry, R.; "Building Construction", East west press, New Delhi, 1999.

# Course Code: ARU-455Duration of Examination: viva voceCourse Title: Architectural Design - VIICredits: 08 (L=2,T=0,U=6)

#### **Course Contents:**

Studio Project would put emphasis on learning methodology to study the historic places by practicing a systematic approach to prepare inventory and doing documentation of a historic site & structure to understand the spatial form, architecture and traditional construction techniques employed in the historic structure.

The project would incorporate assessment of values and present state of conservation to prepare proposals/recommendations for the conservation of selected historic site/structure.

- 1. Chiara, Joseph De; "Time Saver Standards for Building types", McGraw–Hill Professional Publishing. 2001
- 2. Neufert, Ernst; "Architect's Data", 3rd Edition, Wiley-Blackwell. 2002.
- 3. Kanvinde Achyut P.& Miller H James; "Campus design in India :experience of a developing nation", Jostens/American Yearbook Co., United States, 1969.

# Course Code : ARL-456Duration of Examination: 3 hrsCourse Title : Maintenance and Adaptation of BuildingsCredits: 03 (L=2,T=1,U=0)

#### **Course Contents:**

# PART I

- Introduction, Operation, maintenance and Repair of Buildings, Distress in structures, Causes of distress, defects and decay, Damage and detection of damage. Classification of maintenance works, Annual Budgetary provision. Determination of approximate age of buildings. Determination of strength of a member of a Building. Economics of Building-cost in use.
- Maintenance of foundation Repair, settlement- causes, Grillage foundation, Excavation of existing foundation to check its capacity and how to strengthen it. Anti-termite treatment.
- Maintenance of walls: Dampness, causes, effects and remedies. Efflorescence : causes, effect and remedies

#### PART II

- Use of concrete in building structures. Factors affecting durability of concrete. Maintenance and rehabilitation and repair of concrete structure. Physical examination of common defects and damages. Inspection of cracks, causes of failure of R.C.C. structure. Strengthening of R.C.C. balconies and beams. Maintenance of steel structures maintenance procedure and surface protection welding and crack repairs. Merits and demerits of R.C.C. and steel structures.
- Cracks in structure, surface investigation. Remedial and preventive measures. Prevention while repairing load bearing walls. Repair to plaster, Bond between old and new brick wall.

#### PART III

- Maintenance of Roof: Precaution to be taken during construction of R.C.C. roof or masonry wall. Waterproofing of R.C.C. roof. Leakage in R.C.C. roof, Remedial measures. Advantages of lime concrete terracing, maintenance of Pitched roof. Expansion Joints in roof.
- Maintenance of Housing Estate, particulars and information, complaint book, Supervision of maintenance work. Maintenance funds. Maintenance planning - Importance of maintenance. Agency and role of maintenance manager. Importance of check list/ inspection test. Special commercial products used for maintenance and remedy of defects.

- 1. Panchdhari AC; "Maintenance of buildings", New Age international (P) Limited, Publishers, New Delhi, 2003.
- 2. "Maintenance Manual of CPWD", DIRECTOR GENERAL (Works) CPWD, Nirman Bhawan, New Delhi, 2003
- 3. Chudley R.; "The Maintenance and Adaptation of Buildings", Longman Technical Services, London, 1981.

Course Code: ARL-453	<b>Duration of Examination: 3 Hrs</b>
Course Title: Vernacular Architecture	Credits: 03 (L=2,T=01,U=0)

#### PART I

**Introduction to Vernacular Architecture:** Meaning and nature of Vernacular Architecture, Evolution of shelter forms in the varied geographical contexts, Natural and manmade determinants of form: geographical, climatic, historical, anthropological, aesthetic, spatial, folkloristic etc. Relevance in the modern context.

#### PART II

**Vernacular Architecture in the Plains of Northern India:** Building typologies, construction materials and techniques, architectural elements and art forms, functional and aesthetic aspects of vernacular dwellings and the settlement pattern in the plains of Punjab and Rajasthan.

**Vernacular Architecture in the Hills of Northern India:** Building typologies, construction materials and techniques, architectural elements and art forms, functional and aesthetic aspects of vernacular dwellings and the settlement pattern in the Hills of Northern India.

#### PART III

Relevance and interpretation of vernacular architecture in today's context. Approach and works of architects Laurie Baker, Hassan Fathy. Role of Building centers (HUDCO), 'Appropriate' building materials and technology.

Introduction to the concepts of Vaastu, study of scientific aspects of vaastu shastra, relevance of directions.

# Course Code: ARL – 457 Course Title: Hospital Architecture

Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

#### **Course Contents:**

# PART I

- A principled approach to hospital planning:
- Functional Planning
- General Principles
- Grouping of Elements
- Circulation
- Environment
- Aesthetics, Lighting, Colour, Ambience

Types and Levels of Health Services:

- Super Specialty
- Nursing Homes
- Rural Dispensary
- Ayurveda & Nature Cure

# PART II

Planning and Designing Medical Services – Outpatient services, Emergency services, clinical laboratories, radiologic services, diagnostic radiology, radiation therapy department, nuclear medicine, surgical department and new concepts for O.T., labour and delivery suites, physical medicine and rehabilitation. Nursing units and intensive care units, Mortuary.

# PART III

Planning and designing supportive services and engineering services. Admitting department, central sterilization and supply department, pharmacy, food service department, laundry and linen services, engineering department, electrical system, air conditioning system, water supply and sanitary system, centralised medical gas system, fire safety. Medical Education Complexes

- 1. Kunders, G.D., Gopinath, S. & Katakam, Asoka, "Hospitals Planning design and management", Tata MC Graw Hill publishing company Ltd, New Delhi, 2001.
- 2. Rosenfield, Isadore; "Hospital Architecture and Beyond", Van Nostrand Reinhold Company, New York.
- 3. Rotterdam, Bouwcentrum; "General Hospitals", Elsevier publishing company, Amsterdam.

# Course Code: ARL - 458 **Course Title: Disaster Management**

**Duration of Examination: 3 hrs** Credits: 03 (L=2, T=1, U=0)

#### **Course objective:**

The course would focus on types of Environmental hazards and Disasters. The main objective is to study the emerging approaches in Disaster Reduction and Management. The emphasis will be on programmes of National and International organizations for Disaster preparedness, mitigation and awareness.

#### **Course contents:**

#### PART - I

Natural Disasters – meaning and nature of natural disasters, their types and effects. Floods, droughts, cyclones, earthquakes, landslides, avalanches, volcanic eruptions, heat and cold waves, Climatic change: global warming, sea level rise, ozone depletion.

Man made disasters – Nuclear disasters, chemical disasters, biological disasters, building fire, coal fire, forest fire, oil fire, air pollution, water pollution, deforestation, industrial waste water pollution, road accidents, rail accidents, air accidents, sea accidents.

#### PART - II

Disaster management – Effect to mitigate natural disaster at national and global levels. International strategy for disaster reduction. Concept of disaster management, national disaster management framework; financial arrangements; role of NGOs, community based organizations and media. Central, state, district and local administration; Armed forces in disaster response; Disaster response; Police and other organizations. Meaning of environmental hazards, Environmental Disasters and Environmental stress, concept of Environmental hazards, environmental stress and Environmental Disasters.

#### PART - III

Earthquake hazards/disasters - Engineering seismology, plate tectonics, seismic waves, earthquake size and various scales, local site effects, causes of Earthquakes, hazardous effects of earthquakes, Indian seismicity, seismic zones of India, Earthquake hazards in India, Human adjustment, perception and mitigation of Earthquake.

Seismic design concepts, EQ load on simple buildings - load path - floor and roof diaphragms seismic resistant building architecture - plan configuration - vertical configuration - pounding effects - mass and stiffness irregularities - torsion in structures.

- 1. Srivastava, H.N. & Gupta, G.D.; Management of Natural Disasters in Developing Countries; Daya Publishing House, New Delhi, 2006.
- 2. Lusted, Marcia Amidon; Natural Disasters, ABDO Publishing Company, U.S.A. 2011.
- 3. Roxanna Mcdonald; Introduction to Man-made and Natural Disasters and their effects on buildings, Taylor & Francis, 2003.
- 4. Ramroth, William G. Jr.; Planning for Disaster How Natural & Man-made Disasters shape the Built Environment; Kaplan Publishing, USA, 2007.
- 5. Donovan, Jenny; Designing to Heal: Planning and Urban Designing Response to Diaster and Conflict; CSIRO Publishing ,Australia, 2013.
- 6. Pauw, C. De & Lauritzen, E.K.; Disaster Planning, Structural Assessment, Demolition and Recycling, Taylor & Francis, UK, 2005.

Course Code: ARL – 501 Course Title: Town Planning Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

**Course Contents:** 

# PART I

**History of Town Planning:** Historical perspective of urban growth & form in ancient societies (special emphasis on India), Classic cities of the Greek & Roman periods, An overview of urban pattern of medieval town, the renaissance & neo classic city, the industrial revolution & factory towns, Salient features of the ideas & concepts of Ebenezer Howard & Sir Pattrick Geddes

# PART II

**Introduction to town planning:** Concept of a town/ city/ urban area, town classification, town as a physical, social and political entity, Town vs. Regional Planning, Concept of planning; meaning, importance and scope of planning process; planning as a continuous process, Theories of urban structure: Concentric zone, Sector and Multiple nuclei theory

**Preparation of Plans:** Master Plan and its components, Concept of Perspective, Development and Annual plans, Planning at city level: Concept of zoning (use, height and density zoning); landuse planning (residential, commercial, industrial, etc.); urban aesthetics, Site Planning: General guide-lines and basic principles of site planning

#### PART III

**Planning surveys:** Process, various categories of surveys such as physical, socio-economic, traffic, etc., planning data, its presentation & analysis. New towns: Planning considerations & application of spatial standards, Case study of Chandigarh city (planning considerations & planning concept) **Implementation & Administration:** Broad provisions of the Acts related to city planning - Punjab Regional and Town Planning and Development Act, 1995, Land Acquisition Act, 1984 and 74<sup>th</sup> Constitutional (Amendment) Act, 1992. Role of various planning and development authorities - Municipal Corporation, Improvement Trust, Punjab Urban Development Authority, TCPO and HUDCO

- 2. Keeble, Lewis; "Principles and Practice of Town and Country Planning", London: The Estates Gazette, the University of Michigan, 1969.
- 3. UDPFI (Urban Development Plans Formulation & Implementation) Guidelines by Ministry of Urban Affairs & Employment, GOI
- 4. Whittick, Arnold; "Encyclopedia of Urban Planning", McGraw-Hill, New York, 1974.

Course Code: ARL – 502 Course Title: Construction Management Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

**Course Contents:** 

# PART I

Introduction to construction management, its significance, objectives and functions, construction planning and scheduling using bar charts and network techniques, development and analysis of CPM networks. Modular co-ordination, its objectives, basic planning and structure modules.

# PART II

Cost time analysis in network planning, basic terms, concept of optimized cost, procedure of cost time optimization in network planning, exercising shall networks to determine the optimum duration & cost.

# PART III

Inspection and quality control its need on work sites, principles of inspection, stages of inspection and quality control for –Masonry R.C.C and earth work, various method of testing of structures, importance of safety on construction sites.

Equipments used in building industry like earthmoving equipments, compaction equipments, excavating equipments hauling equipment. Mixing equipment, Hoisting equipment.

- 1. Punmia, B.C. & Khandelwal K.K., "Project Planning and Control with PERT\CPM", Laxmi Publications, New Delhi, 2009.
- 2. Mukhopadyay, S.P.; "Project Management for Architects and Civil Engineers", IIT, Kharagpur, 1974.
- 3. Wiest, Jerome D. & Levy, Ferdinand K.; "A Management Guide to PERT/CPM", Prentice Hall of Indian Pub.Ltd. New Delhi, 1982.
- 4. Burgess, SR.A. & White, G.; "Building production and Project Management", The Construction Press, London 1979.
- 5. Dr. P. N. Modi; "PERT and CPM", Standard Book House, New Delhi, 2009.

# Course Code: ARL – 503 Course Title: Green Buildings

Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

#### **Course Contents:**

#### PART I

Introduction to concept of green buildings, efficient use of energy, water and other resources. Protecting occupant health and improving employee productivity. Reduction in waste, pollution and environment degradation. Sustainable design to achieve environmental, economic and social benefits. Concept of L.C.A (life cycle assessment)

#### PART II

Energy Efficiency – active and passive techniques. Importance of passive techniques. Role of orientation, shading and vegetation. Solar gain for winters. Optimization of daylight. Solar water heating. Solar, wind, hydro and biomass power generation and use.

#### PART III

Operation and maintenance optimization, waste reduction and recycling. Overview of various rating systems such as – BREEAM (U.K), LEED (U.S.A, Canada), CASBEE (Japan), Indian Green Building Council (IGBC), GRIHA.

Case studies of relevant green buildings with certifications and rating in India and Abroad. Seminar Presentation with report.

# Bachelor of Architecture (B.Arch.) (Semester-IX) (Under Credit Based Continuous Evaluation Grading System)

# Course Code : ARU-505

#### Course Title : Building Construction – VIII Course Contents:

#### Duration of Examination: viva voce Credits: 5 (L=1,T=0,U=04)

# Production of set of detailed working drawings along with project report including

- Estimates
- Water supply and sanitation drawings
- Specifications
- Schedules using network techniques

- 1. Watson, Don A., "Construction Materials and Processes", McGraw Hill Co., 1972.

- 9. Ataev, S.S; "Construction Technology", Mir Publishers, Moscow, 1985
Course Code : ARU–506 Course Title : Architectural Design – VIII Duration of Examination: viva voce Credits: 8 (L=2,T=0,U=06)

## **Course Contents:**

- Design of Hospital
- Design of District Centre
- Design of Industrial Complex
- Design of Five Star Hotel.

- 1. Chiara, Joseph De; "Time Saver Standards for Building types", McGraw–Hill Professional Publishing. 2001
- 2. Neufert, Ernst; "Architect's Data", 3rd Edition, Wiley-Blackwell, UK, 2002.
- 3. Christine Nickl-Weller, Hans Nickl, Verlagshaus Braun ; "Hospital architecture", 2009.
- 4. National building code of India, Bureau of Indian Standards, New Delhi, 2005.
- 5. Watt D., Surveying Historical Buildings, Donhead Publishing Limited, 2011.

Course Code: ARU – 507 Course Title: Professional Practice & Building Bys Laws Duration of Examination: 3 Hrs Credits : 03 (L=2,T=01,U=0)

#### **Course Contents:**

#### PART I

Definition and aspects of the architectural profession, Role of the Architect: Relationship with the clients and contractor, duties, legal responsibilities. Indian Institutes of Architects: Aims objectives, conditions for engagement and scale of Professional charges, code of professional conduct. Council of Architecture: Its role of regulating the profession and education in Architecture.

#### PART II

Valuation: Classification of value and ownership, purpose of valuation.

Easements: Characteristics, continuous and discontinuous, easements, modes of acquiring easements. Competitions: Its purpose and guidelines, Nature and type of competitions, Registration procedure, conditions for conducting architectural competitions, Board of Assessors, Advisors, Prize money and Honorarium.

#### PART III

Building Bye-Laws: Role in the healthy development of Architecture.

Development Control Rules & General Building requirements as per NBC – Terminology, Requirements of Plots, classification of Buildings, open spaces, Area & height limitations, off street – parking spaces, requirements of parts of buildings.

Study of local building bye-laws

Points of general interest in bye laws of Chandigarh

- 1. Namavati, Dr.Roshan.H., Professional Practice With Elements Of Estimating, published by-Anup Lakhani, Mumbai
- 2. Shah, Charanjit Singh; Architect's Handbook Ready Reckner; Published by Galgotia Publishing Company, New Delhi.
- 3. National Building Code-2005; Published By- Bureau of Indian Standards.

Course Code: ARL–551 Course Title: Architectural Conservation Duration of Examination: 3 Hrs Credits: 03 (L=2,T=01,U=0)

## **Course Contents:**

#### PART - I

#### Introduction to Conservation

Conservation, History of Conservation movement in West and India, Understanding various conservation Philosophies, Approaches and Principles, Understanding of various definitions and terminology such as Historicity, Heritage, Culture, Authenticity, Values, Transformations, Regeneration, Revitalization, Redevelopment, Integrated Conservation etc.

#### **Inventories and Documentation**

Introduction to Fundamental approaches and procedures for the inventories, Understanding process of identification and listing, Introduction to methods of documenting historic sites and structures through site sketches and measured drawings.

## PART - II

## **Role of Charters and Various Agencies in Conservation Practice**

Understanding the Concepts and policies of conservation of built environment with the relevance of Charters as a code of practice in conservation, the role of various international and national agencies (Archaeological Survey of India, Indian National Trust of Art & Cultural Heritage, International Council of Monuments & sites, World Heritage Committee, UNESCO) engaged in conservation practice and policy making.

## PART - III

#### Assessment for State of Conservation of Historic Buildings

Issues related with physical deterioration of built heritage and its conservation, various types of defects/decays, its causes and classification of different agents of deterioration.

#### Role of Historic Building/Area/City in Present Context

Understanding Historic City by doing a study of its Heritage Components, various aspects for spatial Planning, the role of conservation and relevance of historic buildings/areas in present context

- 1. Feilden, Bernard M.; "Conservation of Historic Buildings", Architectural Press; 3<sup>rd</sup> edition, 2003.
- 2. Feilden, Bernard M.; "Introduction to Conservation", UNESCO, 1976.
- 3. Latham, Derek; "Creative Re-use of Buildings", Donhead, edition 2007
- 4. Menon, A.G.K. & Thapar, B.K.; "Historic Towns and Heritage Zones", INTACH, edition 2002.
- 5. "International Charters for Conservation and Restoration" (ICOMOS)
- 6. Parajuli, Yogeshwar K.; "Bhaktapur Development Project Experience in Preservation and Restoration in a Medieval Town", edition 1974-85.
- 7. Gupta, Divay, "Identification and Documentation of Built Heritage in India", INTACH, edition 2007
- 8. Petruccioli, Attilio; "After Amnesia Learning from the Islamic Mediterranean Urban Fabric", *ICAR, edition 2009.*

#### **Course Code: ARL - 552 Course Title: Interior Design**

## Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

**Course Content:** 

## PART I

**Introduction to Interior Design** Definition of Interior Design, Interior Design and architecture, Interior Design Process, themes and Concepts.

A Brief historical perspective of Interior Design in various periods Renaissance, Baroque periods, modern design

# PART II

**Elements of Interior Design** – **Enclosing Elements:** Introduction to various elements in interiors like floors, ceiling walls, staircases, opening, etc. Use of materials and various methods of their treatment to obtain certain specific, functional, aesthetic and psychological effects.

Other elements of interiors like accessories used for enhancement of interiors – paintings, objects de art, furnishing i.e. shades, blends, curtains etc.

**Lighting & Color in Interiors:** Study of interior lighting – different types of lighting, their effects, types of lighting fixtures.

Colour – psychological impact, Colour Schemes, Specials Effects of Colour.

## PART III

**Furniture Design:** Furniture selection in relation to human comforts, functions – materials, methods of construction, upholstery.

Layouts of various rooms - offices, children rooms, bedrooms, lounges etc.

# Course Code: ARL – 553 Course Title: Multistoried Buildings

Duration of Examination: 3 hrs Credits: 03 (L=2, T=1, U=0)

# **Course Contents:**

# PART I

- Development of High-rise buildings in the course of History, Technology and the environment, Infrastructural, Economical, Social and ecological aspects of high-rise development
- The need for effective conceptual Multi-storied design process, Design criteria for Multi-storied buildings, Need for Multi storied development
- A Study of reasons for and methods of high rise developments in our urban centers.
- Siting of multi storied buildings.
- Form of multi storied buildings and their effect of urban-scape psychological implication of using such spatial organizations, consequences of multi-storied building development.

# PART II

Load action on High rise building, various structural systems and construction methods, Introduction to various types of Foundations, Design of various building components

# PART III

Services in multi storied buildings such as Plumbing System, HVAC, Electricity, Sewerage system, Fire fighting, Vertical Circulation System and Efficient evacuation methods.

Note: The above course contents should be supported with live built examples.

Course Code: ARD – 554 Course Title: Architectural Thesis Project Duration of Examination: Viva–Voce Credits: 20 (L=0, T=0, U=20) (Weightage of Final/External Jury = 50%)

## **Brief Course Contents:**

**1. Thesis:** Architectural thesis project represents the culmination point of the academic under graduate program; and offers an opportunity to the students to showcase their knowledge, expertise and skills in architecture acquired during the course of study. Each student, in consultation with the faculty, is expected to demonstrate his/her vision for bringing in positive changes to our built environment.

**2. Subject of Thesis:** Each student, within a specified time period, shall submit the subject of the thesis project he/ she proposes to work upon. The project may be live or hypothetical or conceptual one related to architecture; and must reflect its relevance to the trends in architecture across the globe. The students may commence their work on the subjects so proposed only after the approval of the Board of Control.

3. Contents of Thesis: An architectural thesis project shall comprise of the following:

- a) A well formatted and neatly typed report illustrated through drawings, sketches, photographs, tables and diagrams; which should include Introduction to the Project (Project Brief, Validity, Aims and Objectives and Methodology), Literature Review, Prototype/ Case Studies, Site Analysis, Architect's Brief and Design Criteria, Conclusions and the Design Proposals.
- b) Presentation Drawings and Model for the fully worked-out Design Proposal.

**4. Reviews and Internal Evaluations:** Each student will be assigned to a panel of thesis supervisors (hereafter referred to as panel) comprising of 3-4 members based on the norm of having one member for three/four students. The panel will be responsible for supervising and monitoring the progress as well as evaluating various stages of the thesis project as mentioned below:

Bachelor of Architecture (B.Arch.) (Semester-X) (Under Credit Based Continuous Evaluation Grading System)

Sr. No.	Stages	Max. Marks (% of total)	Details
1	Synopsis	5%	Project Brief, Validity/Need- Identification, Aims and Objectives Introduction to the Site and Methodol- ogy
2	Rough Report	15%	40-60 pages, A4 size, landscape for- mat, font: times new roman, font size: 16, 14, 12, line spacing 1.5; margin 4 cm on left and 2.5 cm on the other sides
3	Preliminary Design Submission (Stage-1)	15%	The Basic Design Development, Worked out site plan and floor plans, architectural forms & expression, model/s etc.
4	Preliminary Design Submission (Stage-2)	15%	Detailed worked out Site Plan and Floor Plans, Sections, Elevations, Models etc.

- **5. Final Submission:** Each student shall submit the final report, presentation drawings and model/s as part of the final submission which shall eventually be returned after the final evaluation process is over. In addition, each student shall also submit two identical copies of the final report along with a soft copy, complete in all respects, along with one hard copy for each member of the panel. The copies of the final report must also include A-3 size copies of all final drawings and at least two photographs of the final model/s.
- **6. External Evaluation:** The Final Jury shall comprise of the Head of the department/his nominee and the external examiner/s. Weightage of marks assigned for external evaluation shall be 50% of the total marks. The final grades will be awarded by the Board of Control with all supervisors to be invited as special invitee, if they are not members of the Board of Control
